

Imputation of missing Product Information using Deep Learning

A Use Case on Amazon Product Catalogue

Aamna Najmi, 01.07.2019

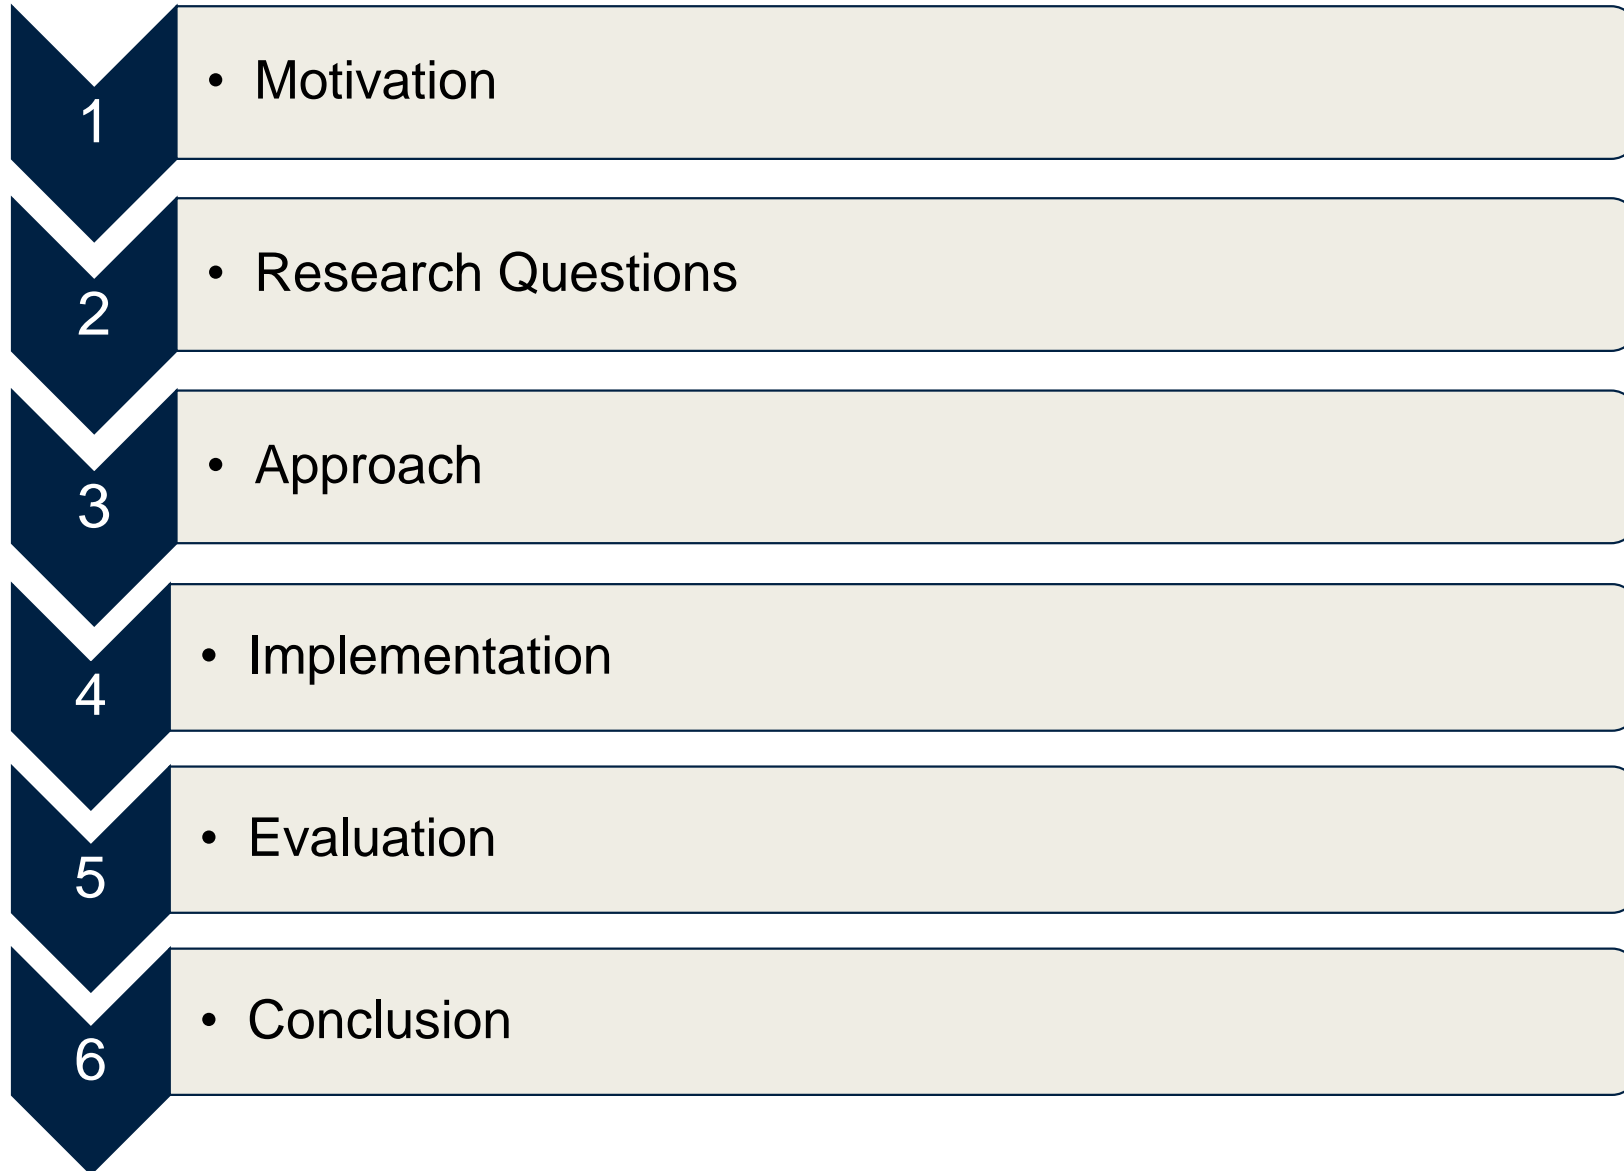

Advisor: Ahmed Elnaggar

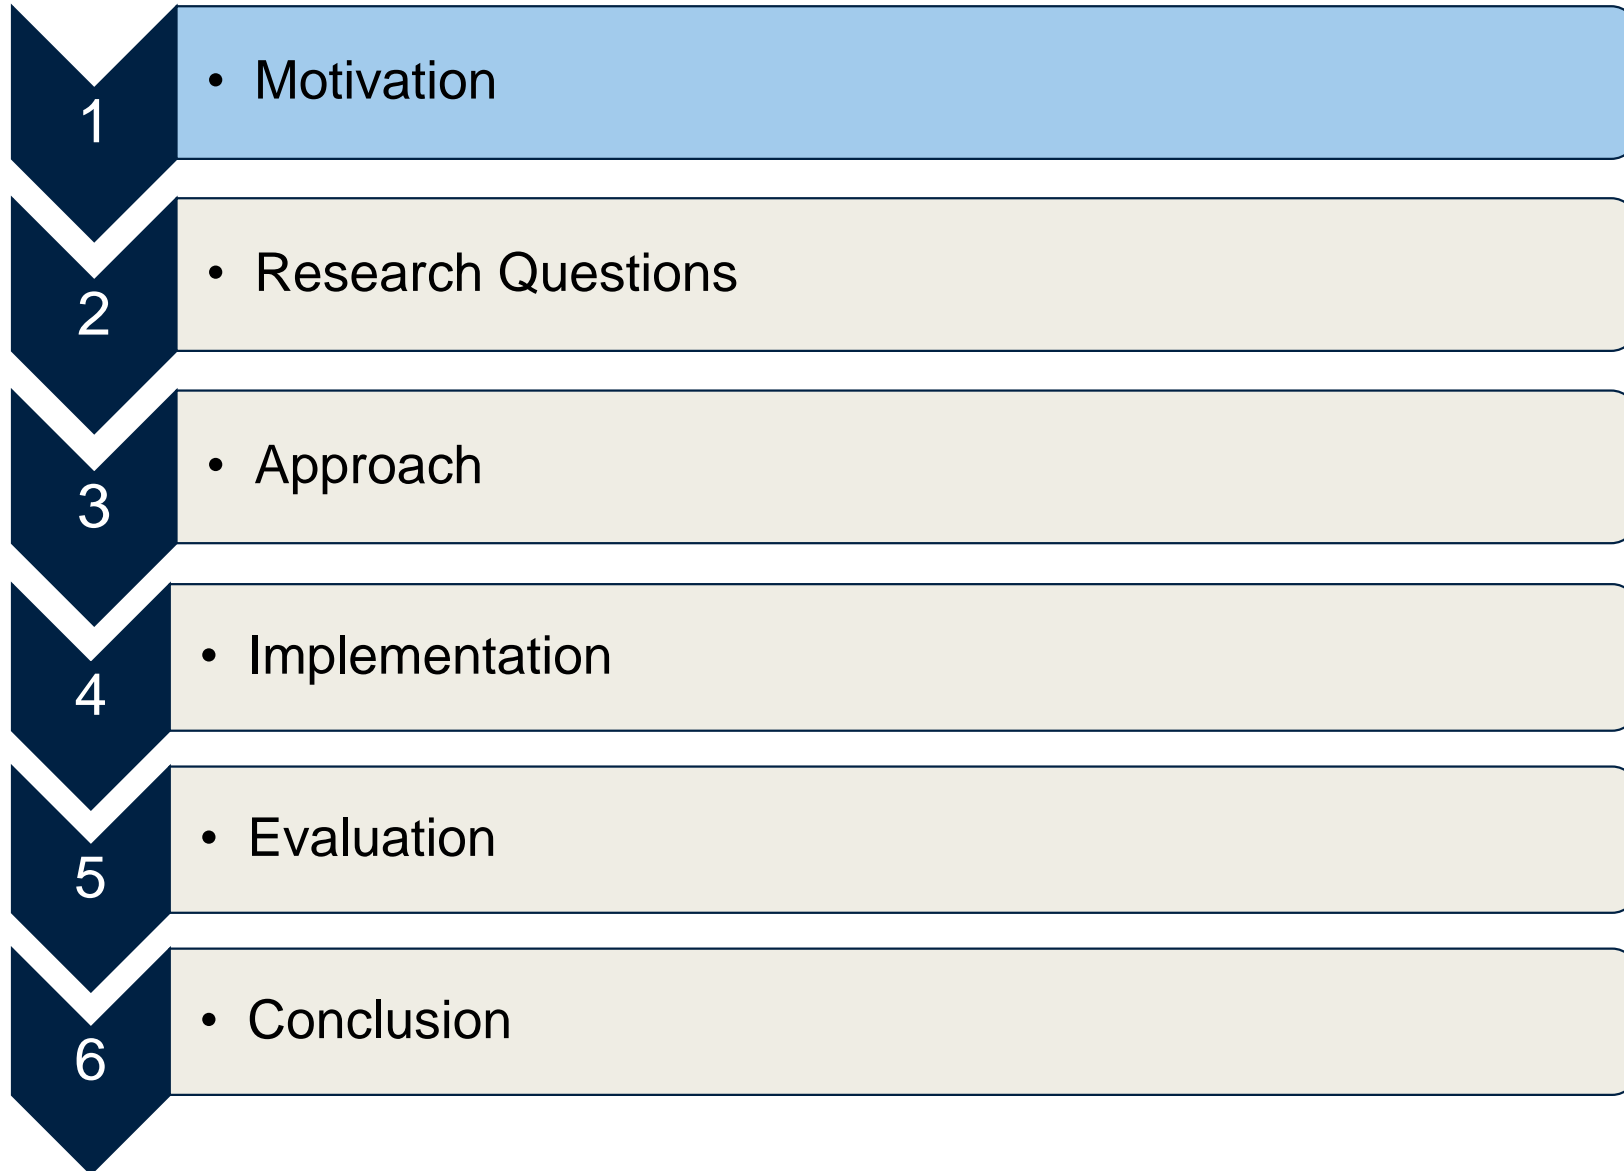

Chair of Software Engineering for Business Information Systems (sebis)

Faculty of Informatics

Technische Universität München

www.matthes.in.tum.de

Motivation

- Global retail ecommerce sales will reach about \$4 trillion in 2020, accounting for 14.6% of total retail spending worldwide [1]
- 20% of purchase failures are potentially a result of missing or unclear product information [2]
- Detailed product information = improved customer experience and company profit

Women > Skirts

Cindy H
Long Stonewash Denim Skirt Maxi Full Length SKIRT68
★★★★★ 20 customer reviews | 4 answered questions
Price: £39.00 & Free Returns on some sizes and colours
Fit: As expected (82%)
Size: Select Size Chart

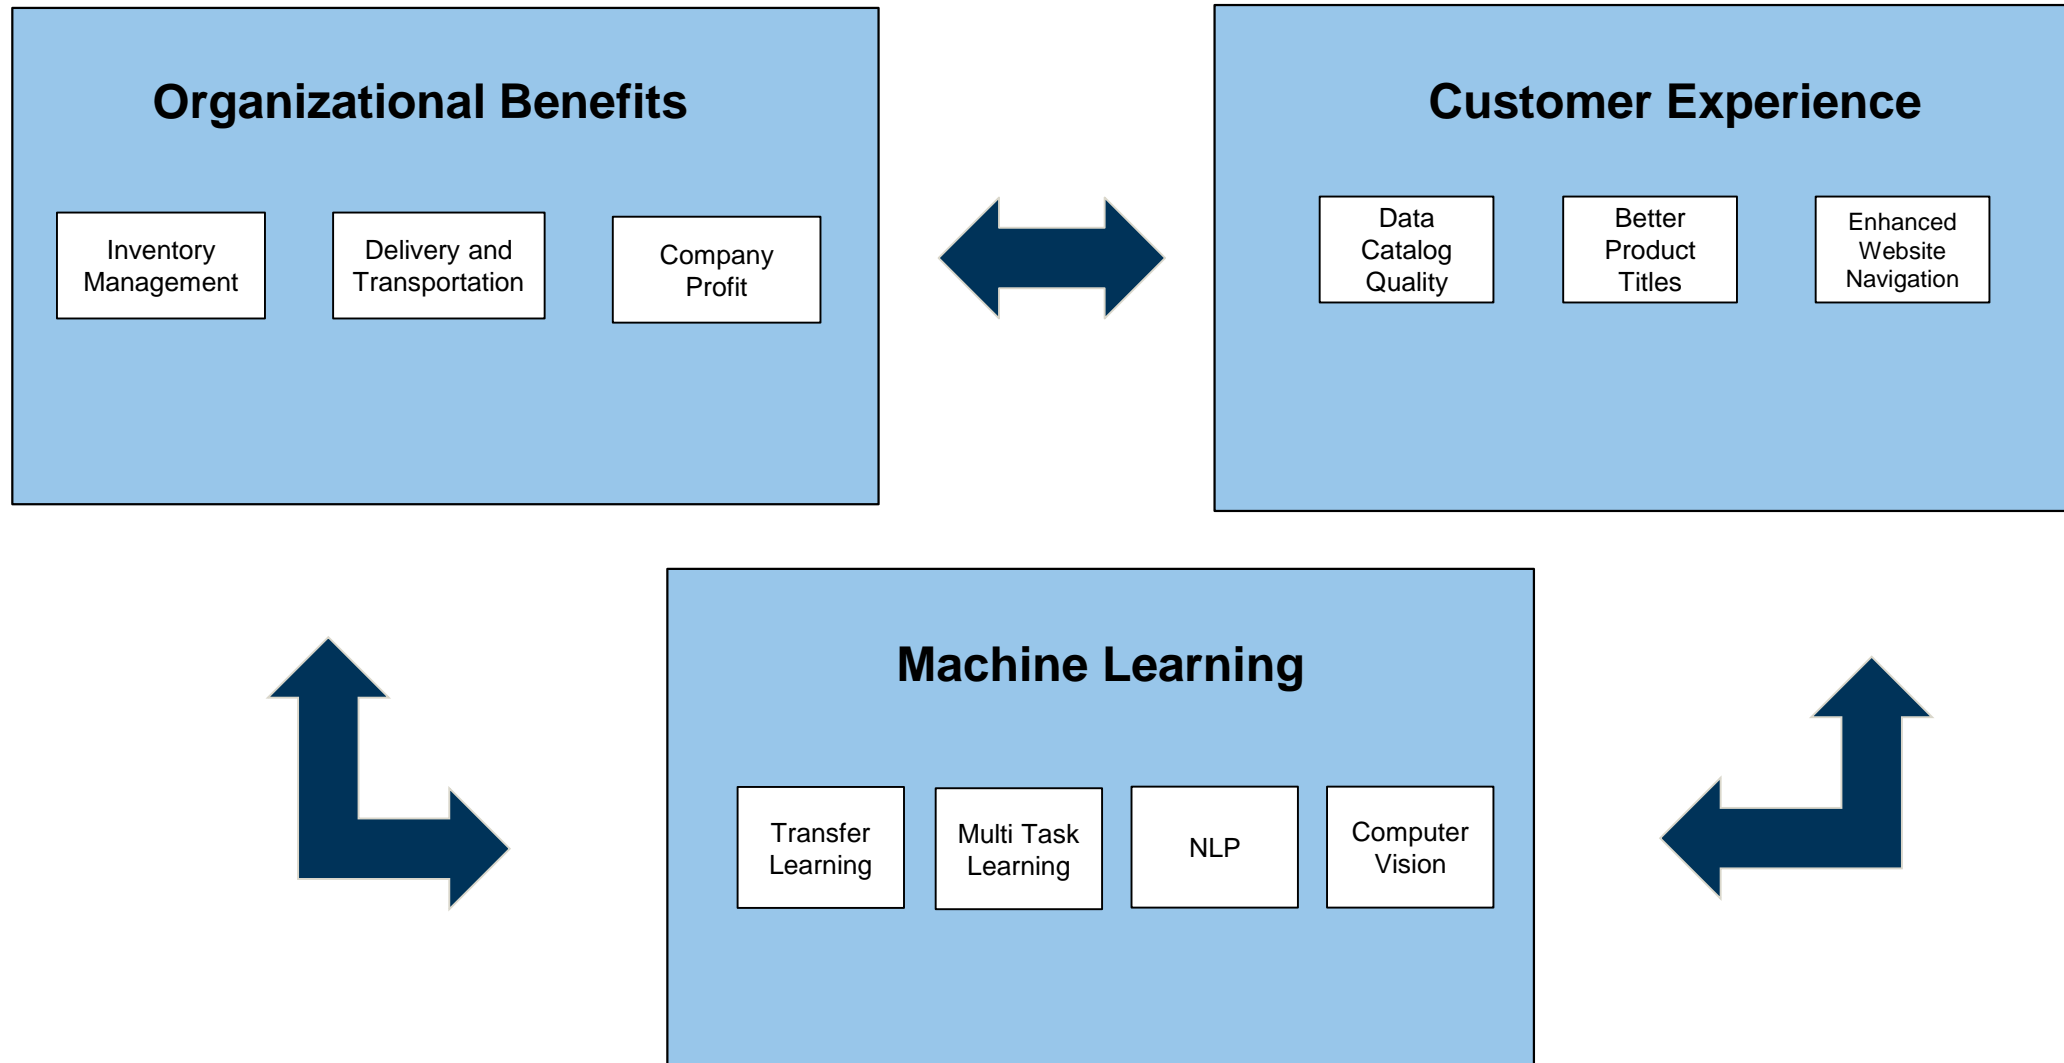

- Medium weight denim with belt loops
- Please refer to our size guide in the product images
- 68% Cotton, 30% Polyester, 2% Elastane
- Machine Washable
- Full
- Brand New with Tags

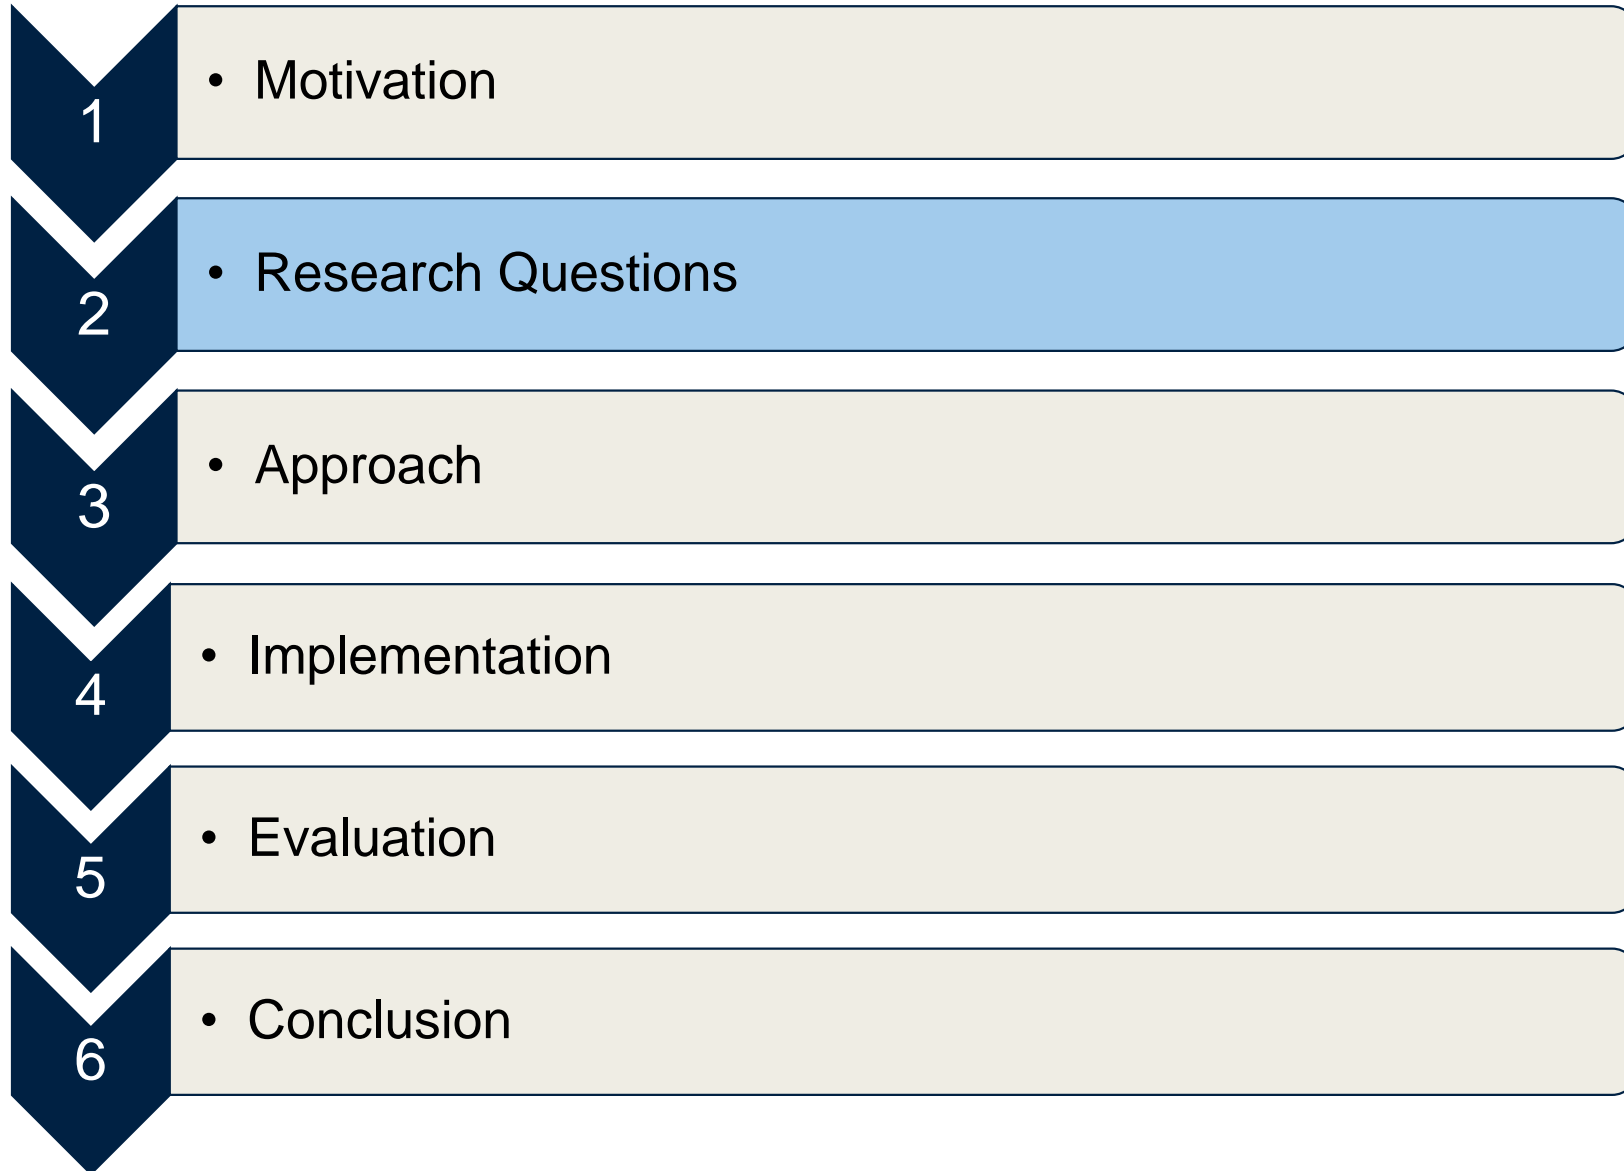

Shop our most loved styles

Nouvelle Collection
Nouvelle Collection New Womens Plus Size Dress Ladies Wet Look Bodycon Midi PVC Short Sleeve Knee
★★★★★ 1 customer review
Price: £17.99
Size: Select Size Chart
Colour: Black

- Casual Wear
- Bodycon Midi Dress
- 95% Polyester, 5% Elastane
- Regular Fit
- PVC Wet Look
- 40" (102cm) in full length
- 95% Polyester 5% elastane

New Releases
Only on Amazon

Research Questions

1

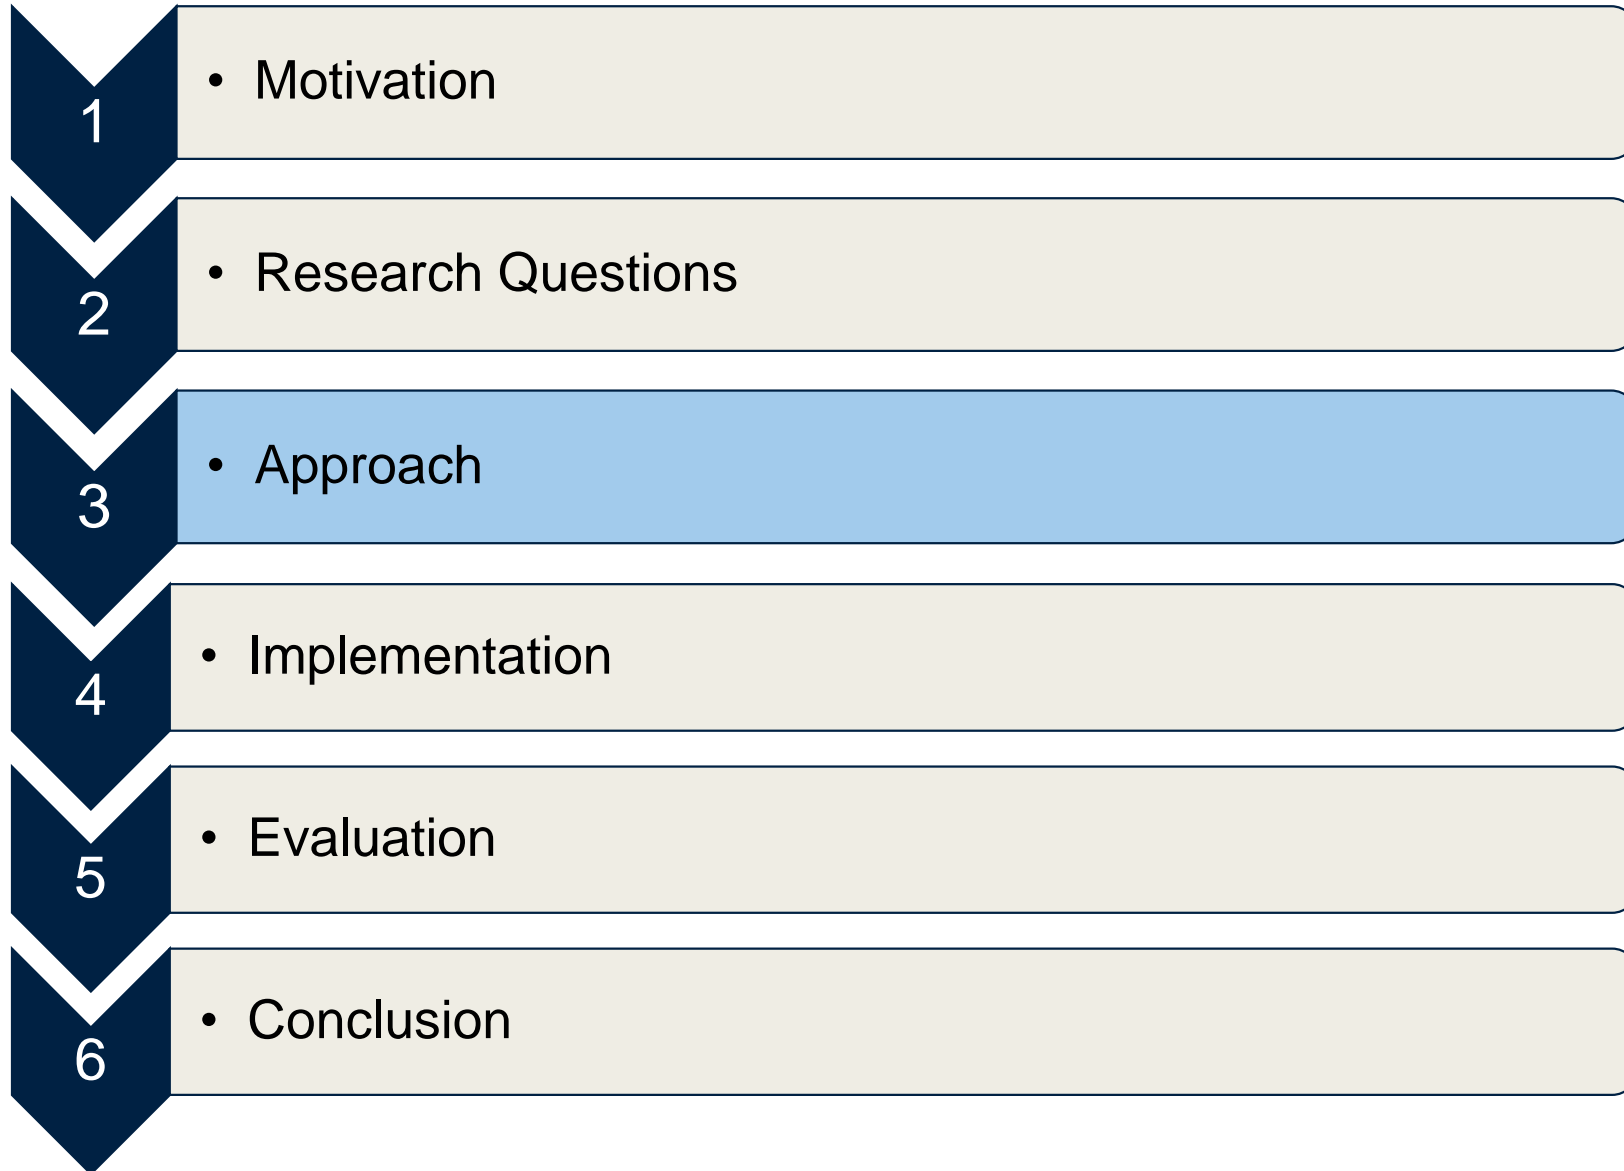

Could Multi-task Learning (MTL) and Transfer Learning (TL) perform better than Single Task Learning (STL) on the Amazon Product Catalog dataset?

2

What architecture choices and hyperparameters shall we use in both Multi-task and Transfer Learning to obtain good performance?

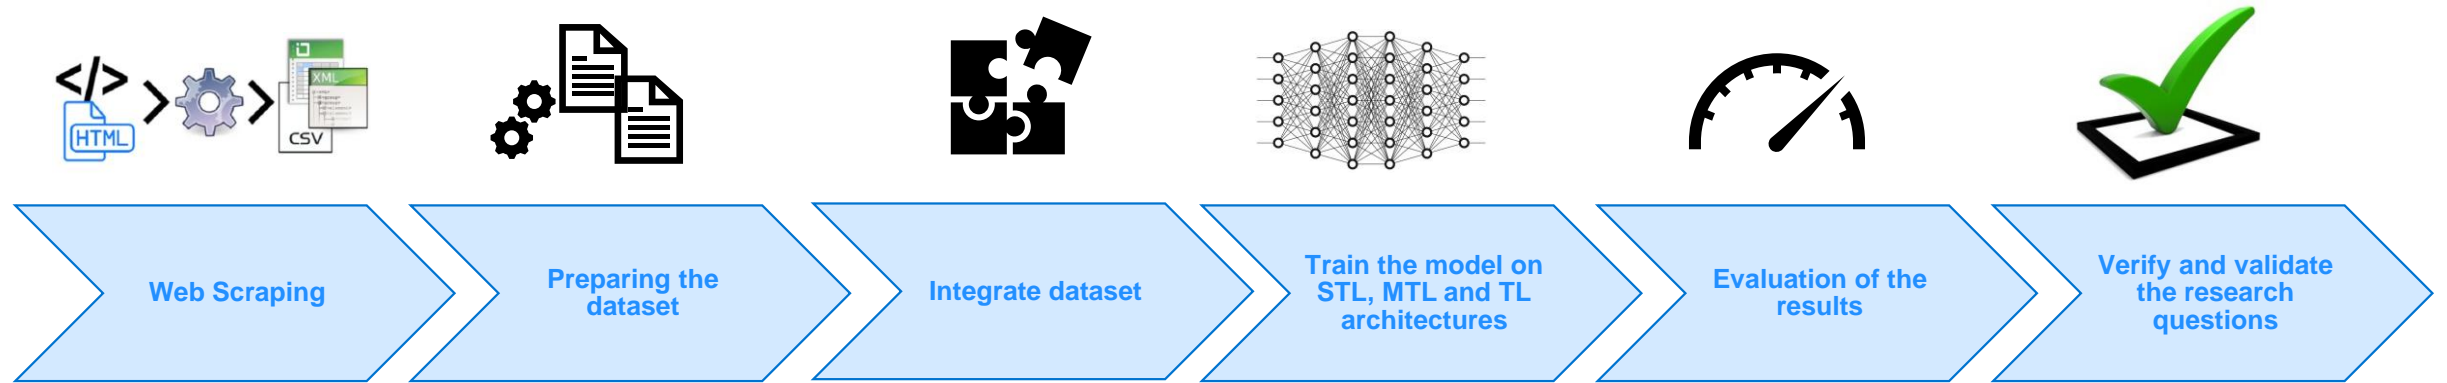

3

Can Transfer Learning and Multi-task Learning be useful in the e-commerce domain to enhance user-experience?

Approach

Methodology

Single Task Learning

- Each task is trained independently
- Model is trained in isolation and is task specific
- Network approximates a function for output of a single task only
- Same model cannot be good in generalizing for other tasks

Single Task Learning (STL)

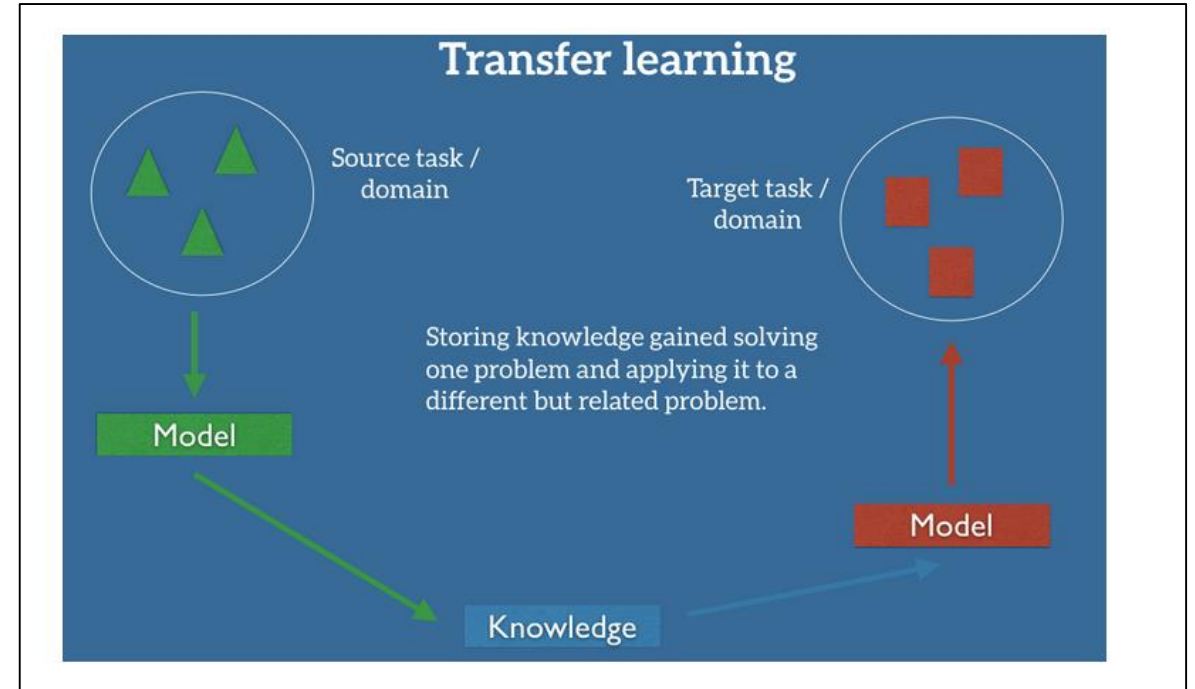

Image courtesy: Multi-Task Learning: Theory, Algorithms, and Applications
SDM 2012

Transfer Learning

- Domain adaptation technique
- Source and target domain have different datasets and the tasks may or may not be same [3]
- Pre-trained networks trained on a large dataset like Imagenet [4]
- Source dataset generally much larger in size
- Overcome issues like class imbalance problem and shortage of data

Approach

Multi-task Learning

- Domain adaptation technique
- Promotes generalization over multiple tasks [5]
- Tasks trained in parallel
- Optimizes more than one loss function
- Form of inductive transfer
- Can be of two variants: Soft parameter or Hard parameter sharing [6]

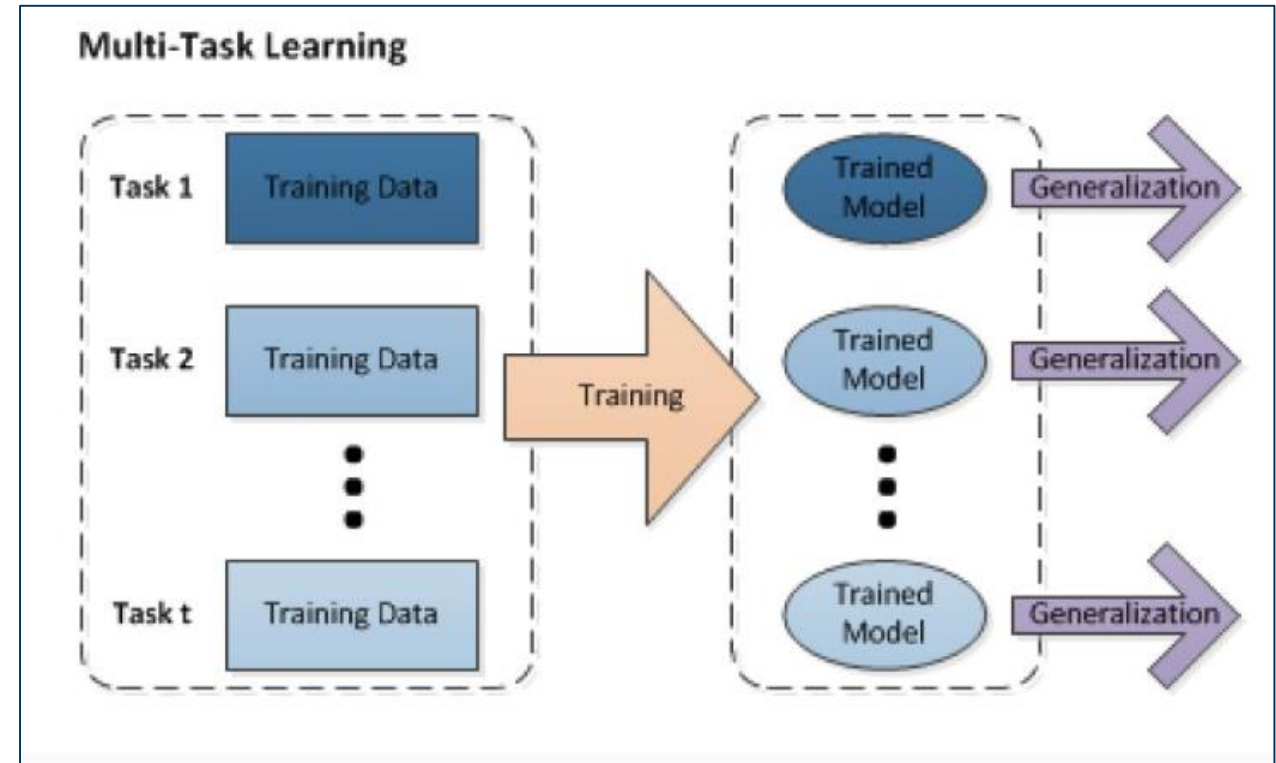

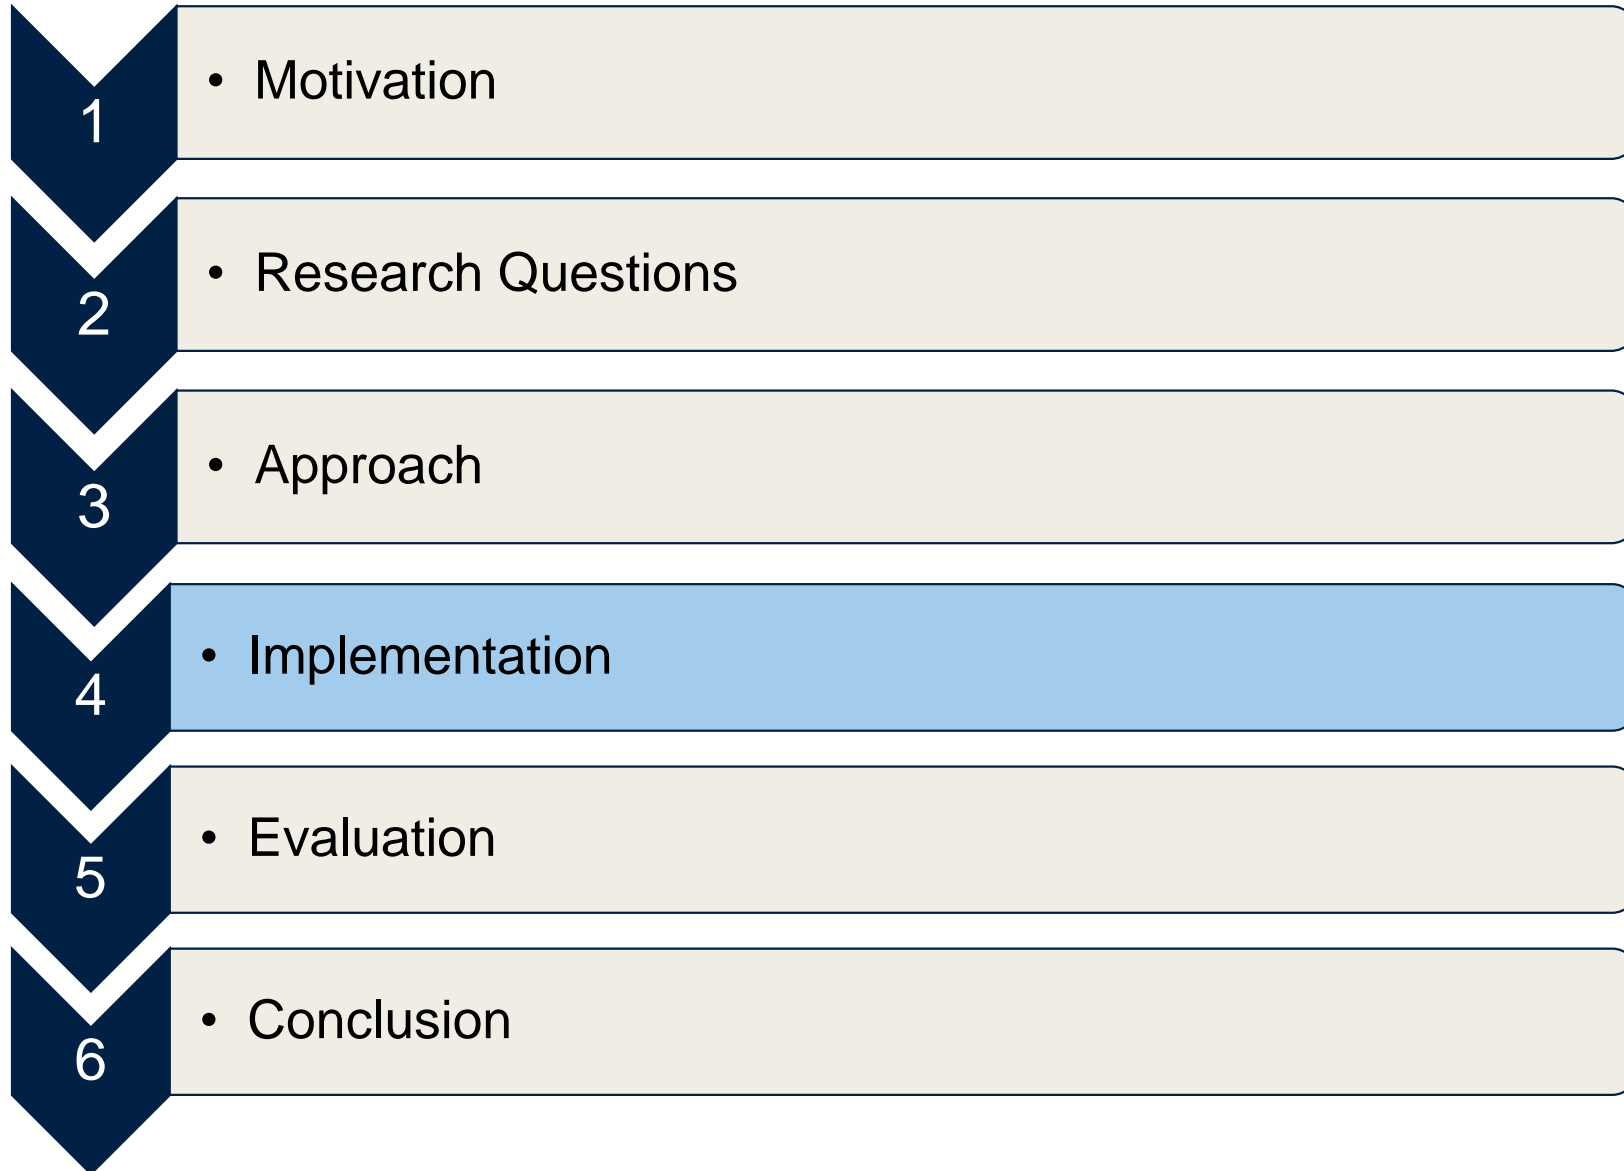

Image courtesy: Multi-Task Learning: Theory, Algorithms, and Applications
SDM 2012

Dataset Overview

- **Source:** Scraped data from five regional Amazon websites (UK, DE, FR for text based and UK, DE, IT for image based)
- **Records:** ~200k from each website
- **Attributes:** Product ID, Product Title, Product Description, Color, Category, Brand, Target Gender, Product Summary, Product Specifications, Product Image
- **Samples**
 - *Nike Slam Women's Dri-Fit Tennis Skirt - Black*-XL: Amazon.co.uk: Clothing.
 - *Aerolite* Leichtgewicht 4 Rollen *Trolley* Koffer Kofferset Gepäck-Set Reisekoffer Rollkoffer Gepäck, 3 teilig, *Schwarz/Grau*: Amazon.de: Koffer, Rucksäcke & Taschen.
 - *Diesel* pour *Homme* Waykee L.32 *Pantalon - Noir* - 32 W/34 L: Amazon.fr: Vetements et accessoires.

Image based models

- State of the art Convolutional Neural Network (CNN) called Inception Resnet V2 [7]
- The network model has outperformed previous state of the art architectures on the Imagenet dataset challenge that involves image classification task.
- Use the architecture with variations in neural blocks and training schemes for our tasks.

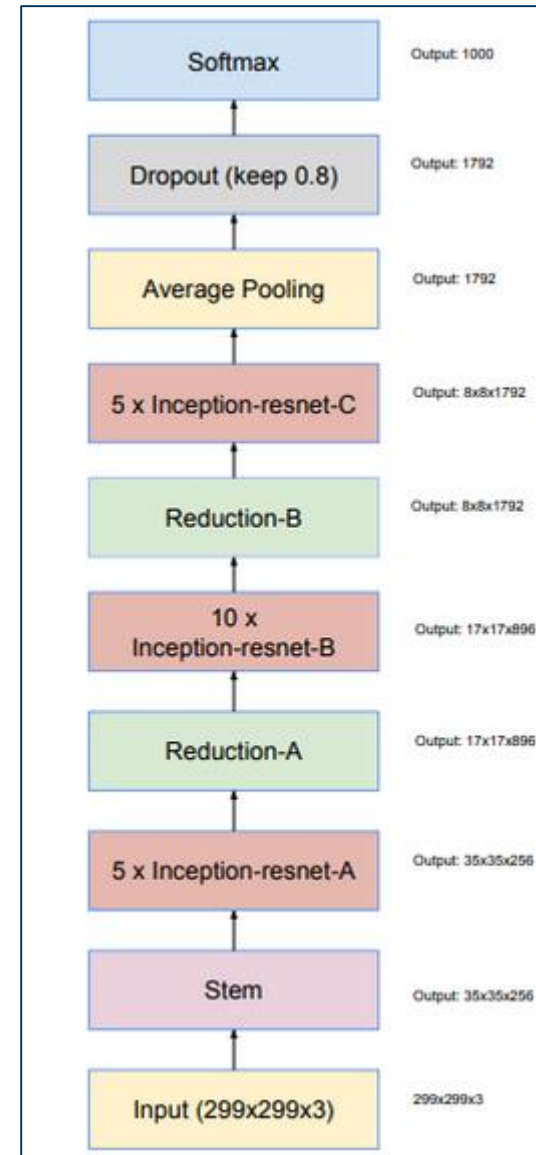

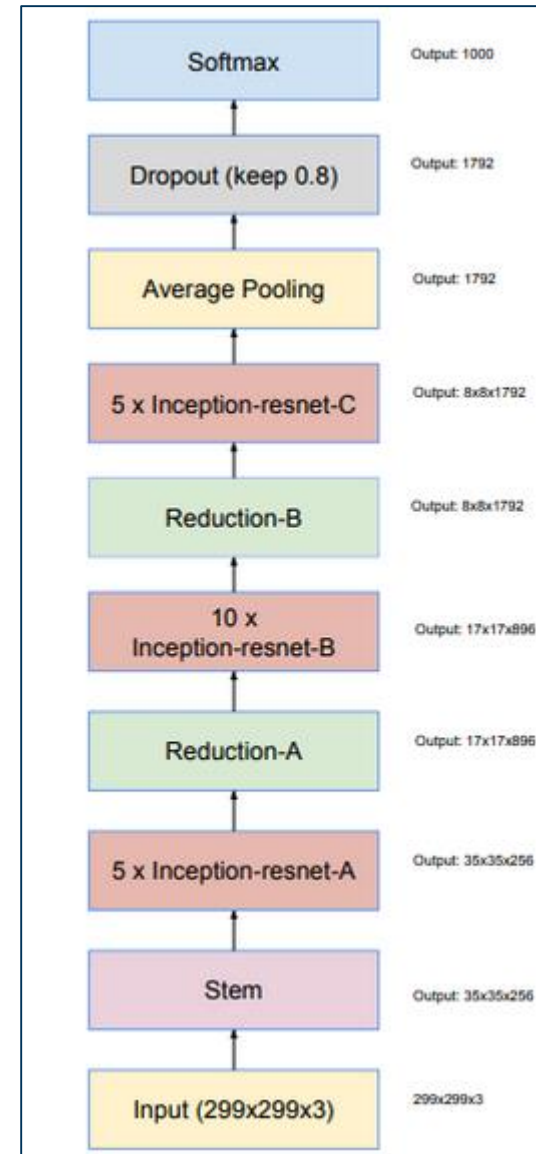

Image based models

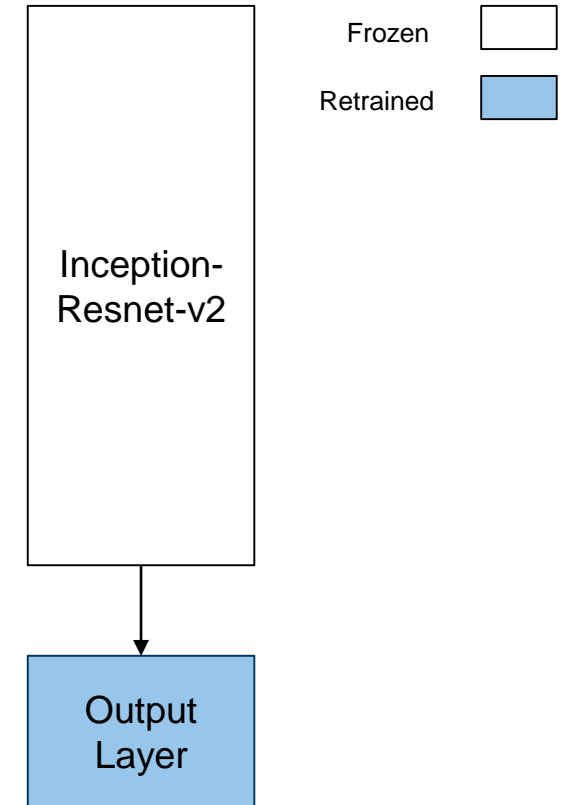

Single Task Learning

- Trained Inception Resnet Model V2 from scratch
- Integrated the image dataset for each of the 12 tasks with the model independently
- Cross Entropy as the Loss function
- Stochastic Gradient Descent with momentum as optimizer

Transfer Learning- Strategy I

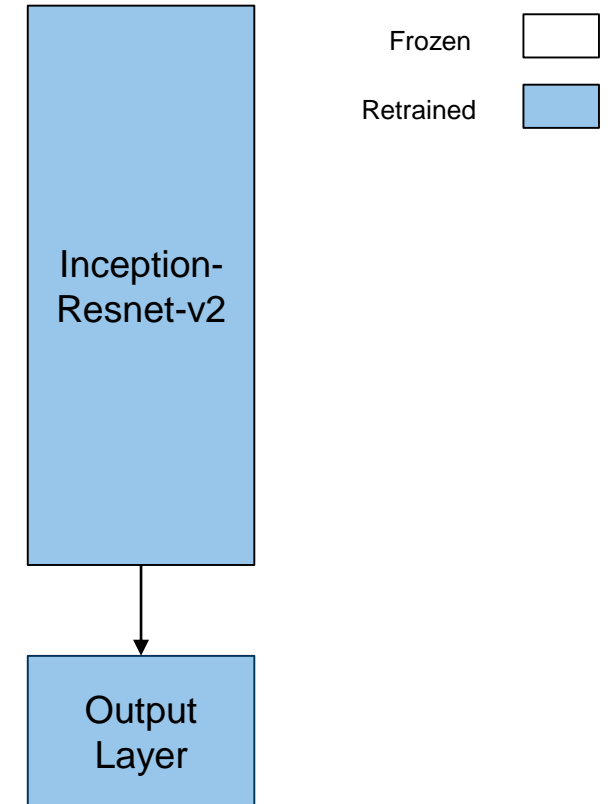

- Used pretrained version of the Inception Resnet V2 Model
- Model trained on the Imagenet benchmark dataset
- This strategy involves freezing the pretrained layers and adding an additional output layer at the end
- Only the Output layer is retrained
- Cross Entropy as the Loss function
- Stochastic Gradient Descent with momentum as optimizer

The first version of the network used to implement Transfer Learning on images

Transfer Learning- Strategy II

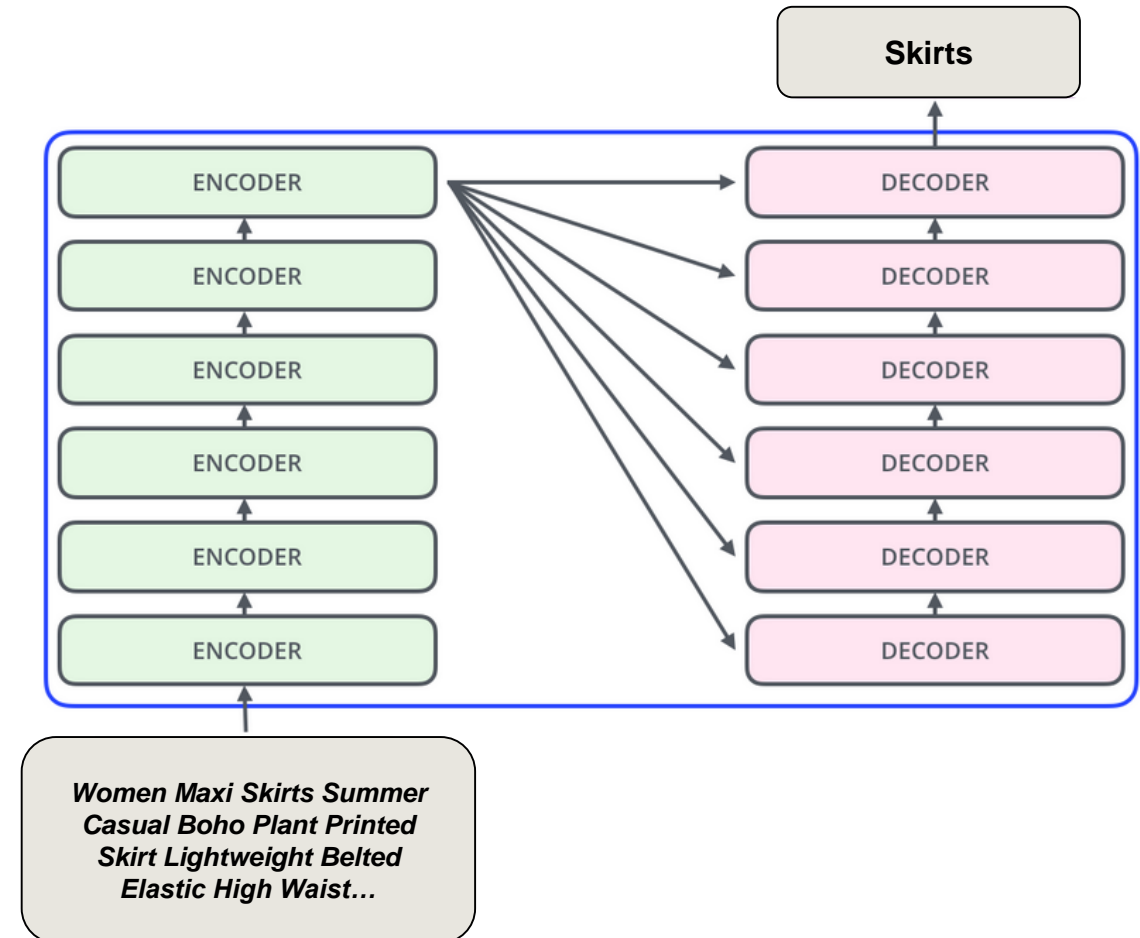

- Used pretrained version of the Inception Resnet V2 Model
- Model trained on the Imagenet benchmark dataset
- This strategy involves initializing the network with the pretrained weights adding an additional output layer
- The entire network alongwith the Output layer is retrained
- Cross Entropy as the Loss function
- Stochastic Gradient Descent with momentum as optimizer

The second version of the network used to implement Transfer Learning on images

Text based models

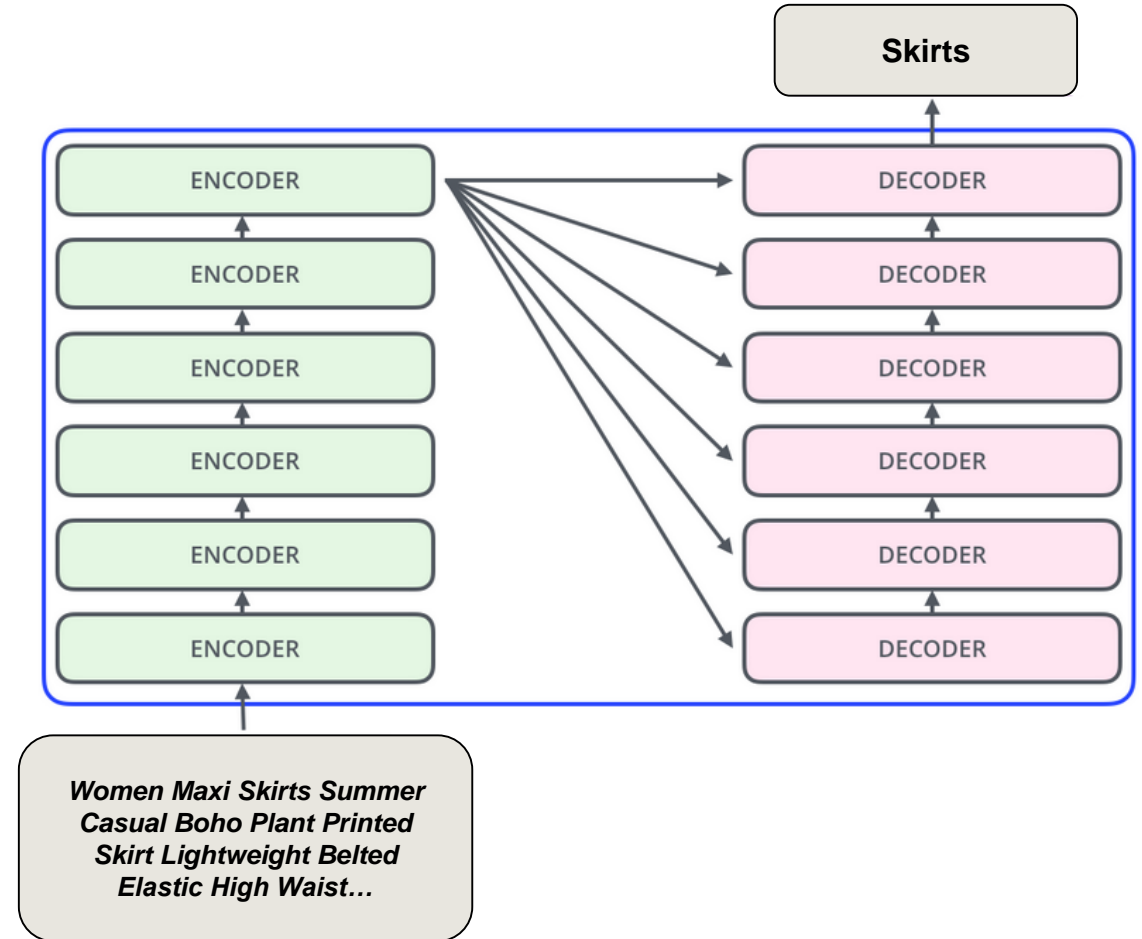

- State-the-art sequence to sequence model called **Transformer**
- Uses an attention mechanism that works well with text related tasks [8]
- Consists of encoder and decoder unit with attention mechanisms [9]
- Each layer of encoder and decoder consists of a feed forward layer
- The transformer model is implemented and trained using the Tensor2Tensor (T2T) library

Text based models

Single Task Learning

- Used the Transformer model
- Trained a separate model for every text based task
- 12 independent models for 12 tasks
- Implemented single task training using T2T

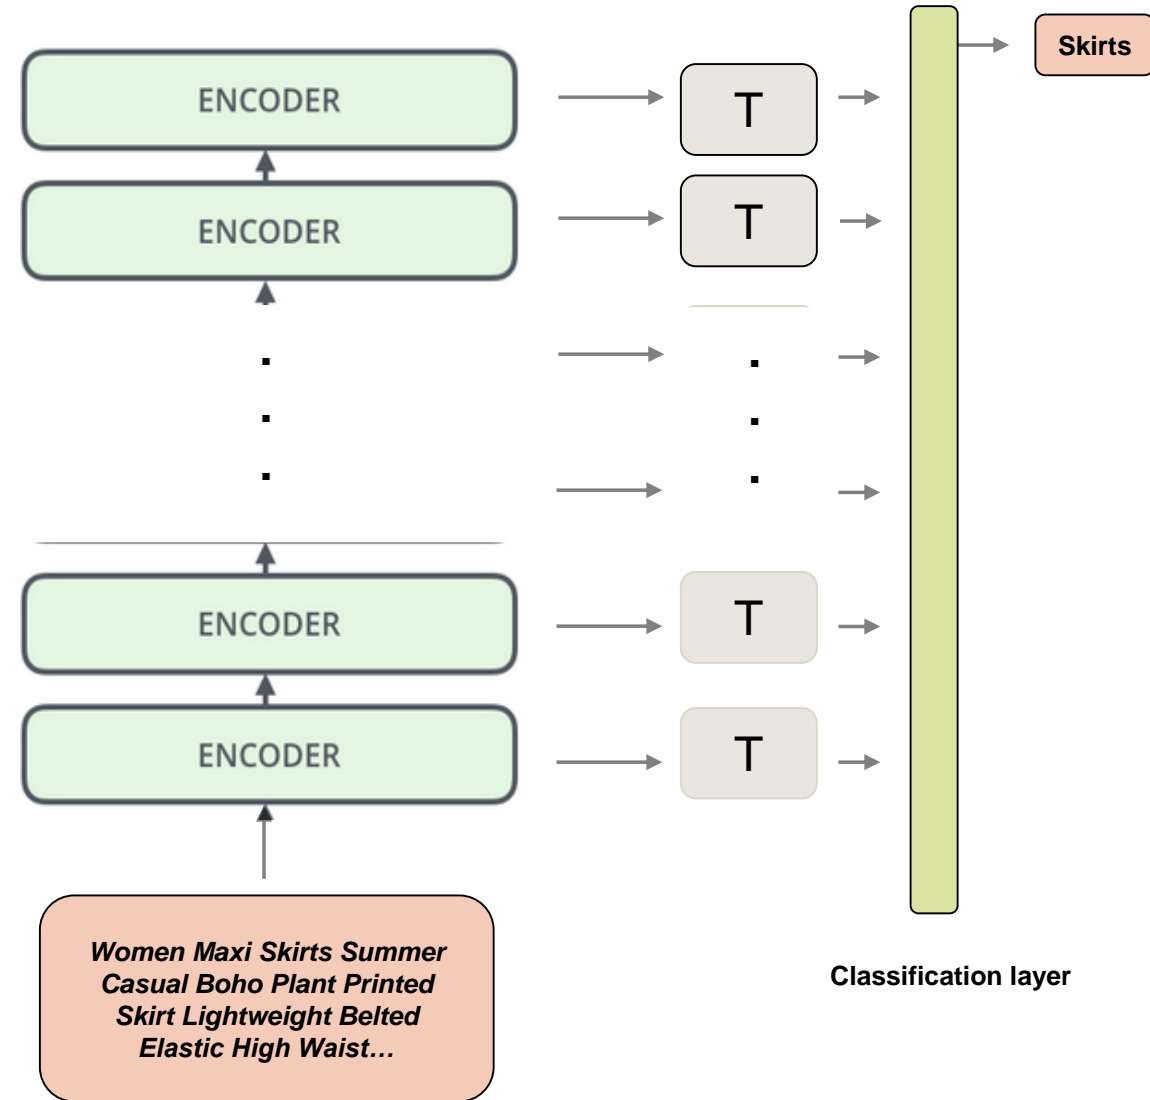

Implementation

Text based models

Transfer Learning

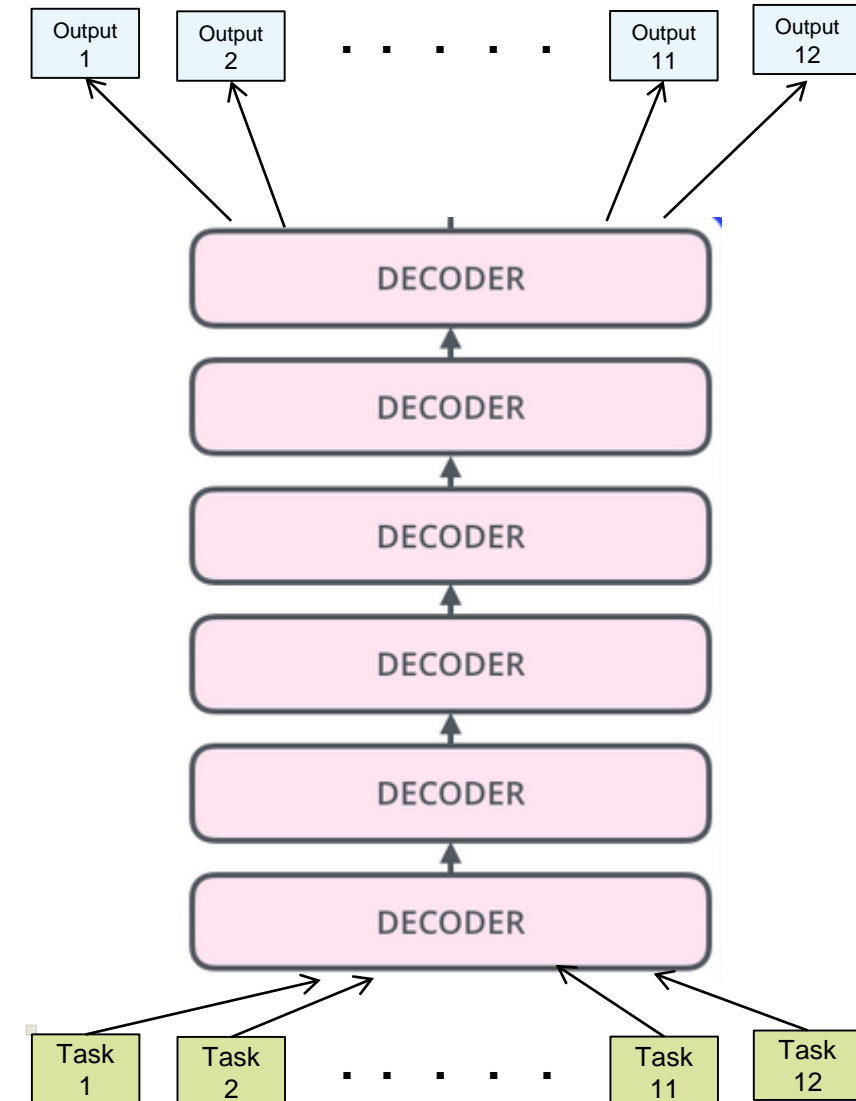

- Context aware network called BERT (*Bidirectional Encoder Representations from Transformers*) [10]
- The model is pretrained on a language modeling task using the Wikipedia corpus in French, German and English
- Used the base version of BERT which consists of 12 layers, 12 self attention heads and a hidden size of 768 [11]
- The pretrained model weights are frozen and only the last layer for classification is used get the class scores

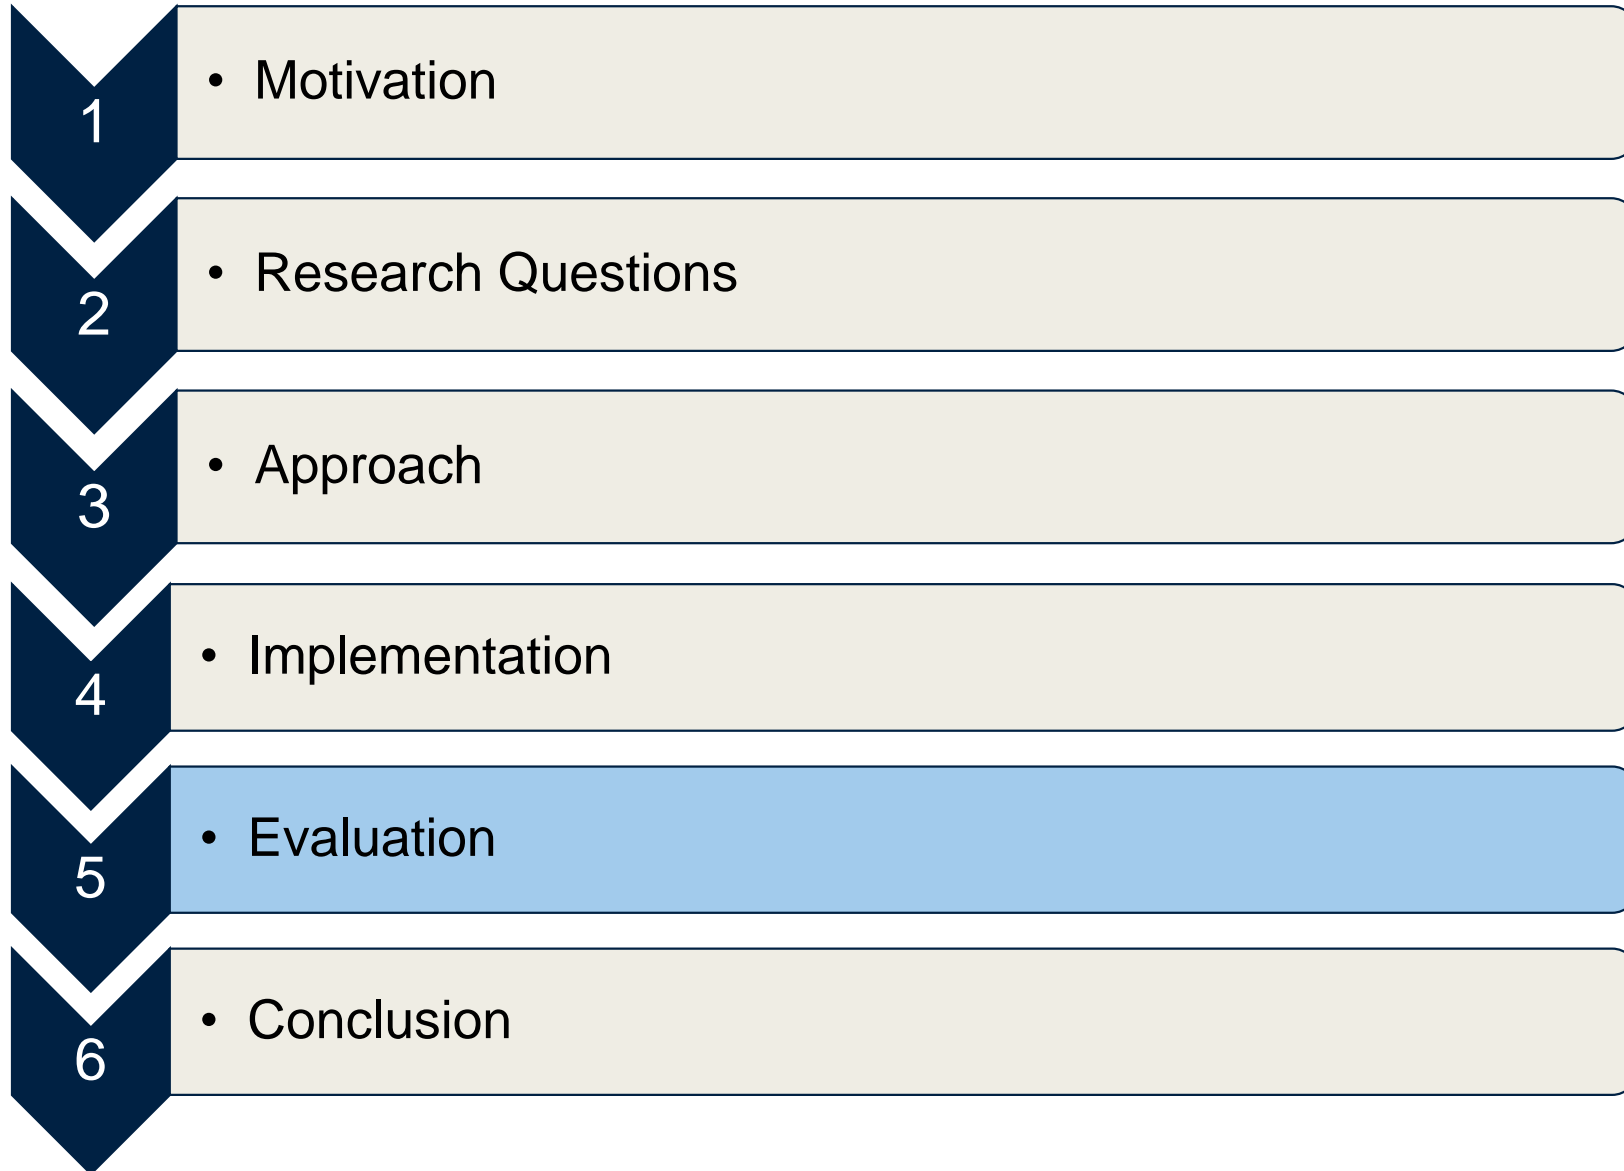

Text based models

Multi-task Learning

- Trained all the 12 tasks across languages and task families concurrently using the Transformer
- Additional Language Model (LM) task based on Wikipedia corpus consisting of English, French, Romanian and German tokens.
- The 12 text based tasks are appended after the LM task
- All the tasks use the LM vocabulary to generate and integrate the data using T2T
- Multiple loss functions optimized concurrently

Experimental Setup

- Hardware

	Machine
Name	DGX-1
GPUs	8x Tesla V100
Core	41k
Memory	8x 16GB

- Software

Programming Language	Python
Scraping	Requests Method, Beautiful Soup package
Text based models	Tensor2Tensor framework, tensorflow
Image based models	Pytorch framework, pretrainedmodels package

Experimental Setup (contd.)

- Hyperparameters

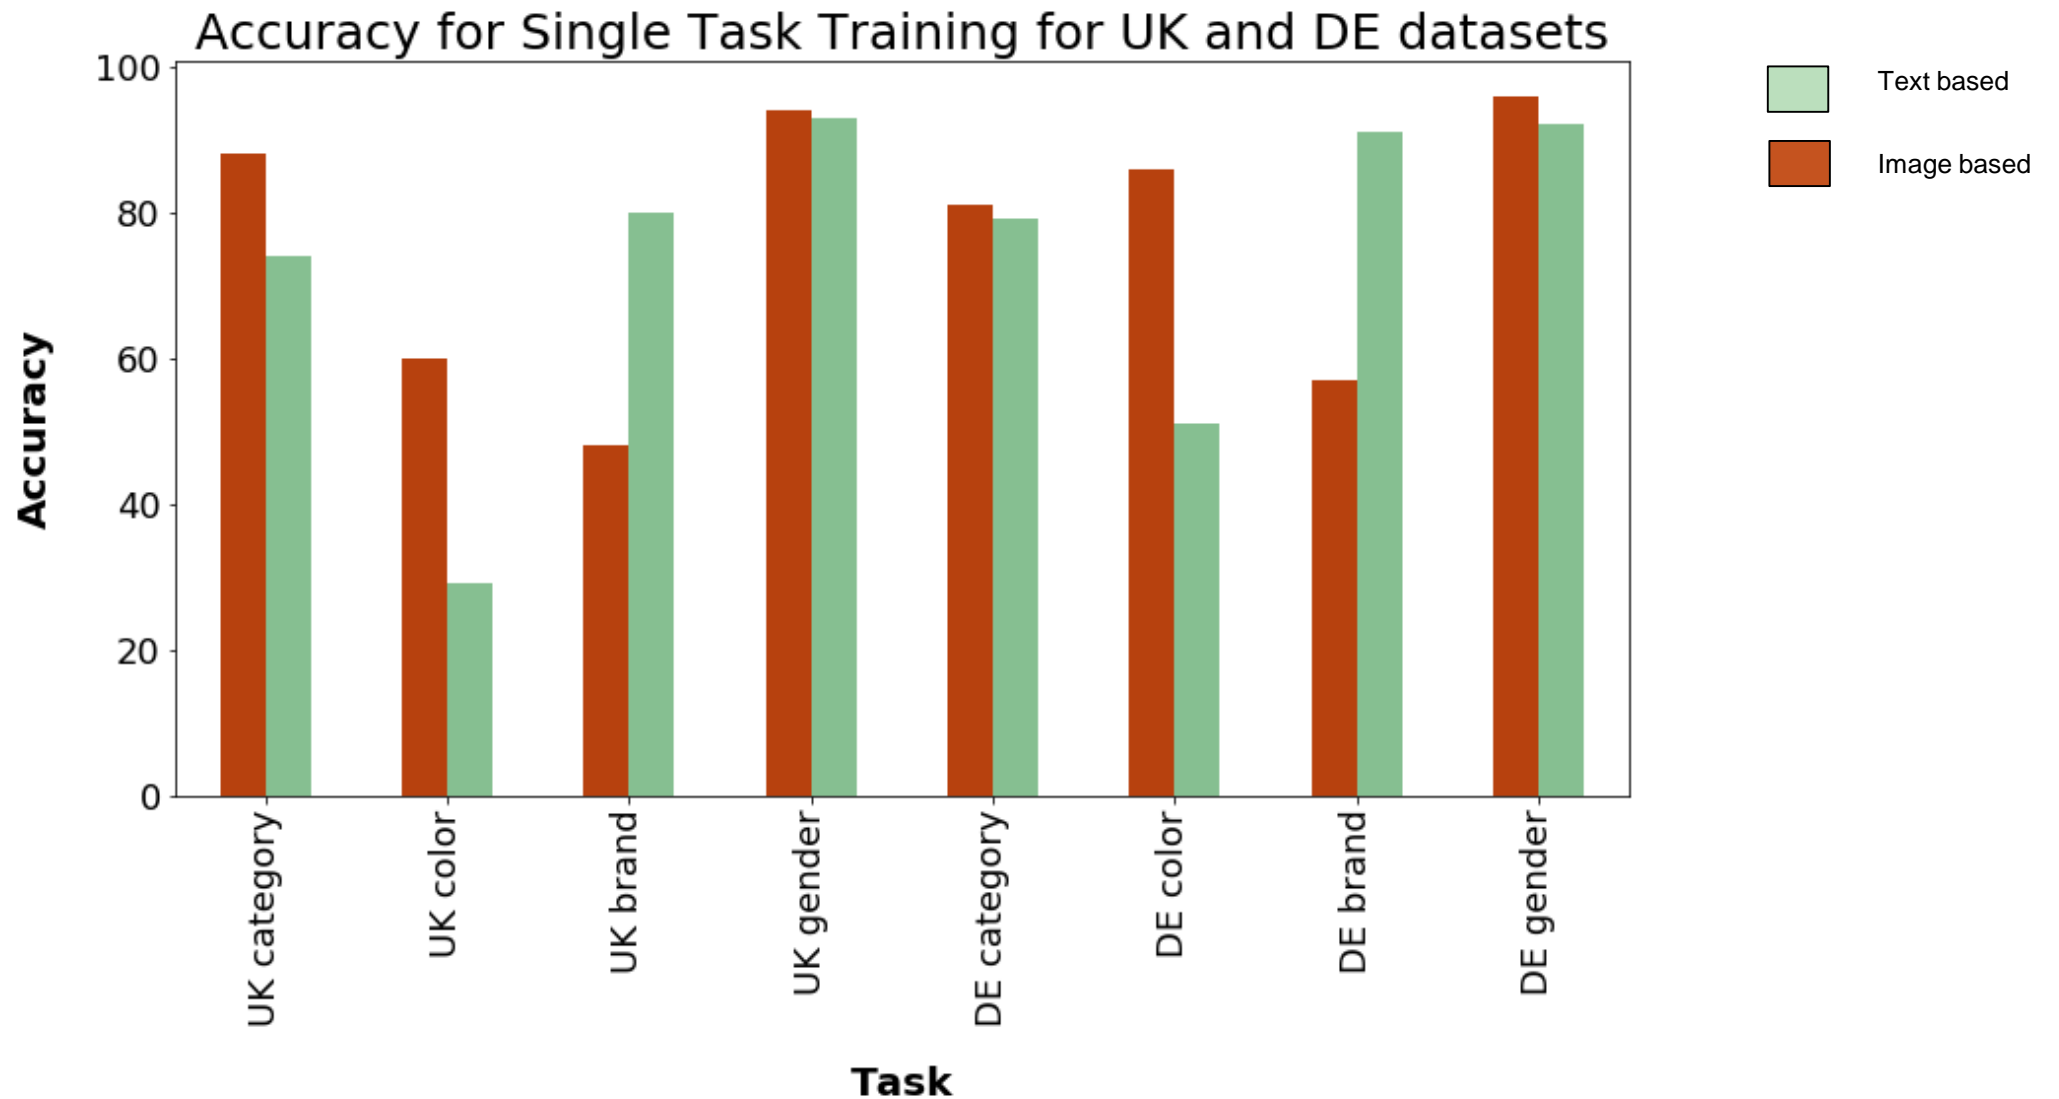

Text based

	Single Task	Transfer Learning	Multi-task Learning
Model	Transformer	BERT	Transformer
Hidden size	512	768	1024
Filter size	2048	3072	8192
Batch Size	4096	32	1024
Optimizer	Adam	Adam	Adam
Maximum sequence length	300	300	512
GPUs used	1	1	8

Image based

	Single Task	Transfer Learning: Strategy I	Transfer Learning: Strategy II
Model	Inception-Resnet-V2	Inception-Resnet-V2	Inception-Resnet-V2
Fine tuning	No	Last Layer only	Whole Network
Pre-trained	No	Yes	Yes
Batch size	196	1024	196
Optimizer	Adam	Adam	Adam
GPUs used	7	1	7

Evaluation- Single Task Training

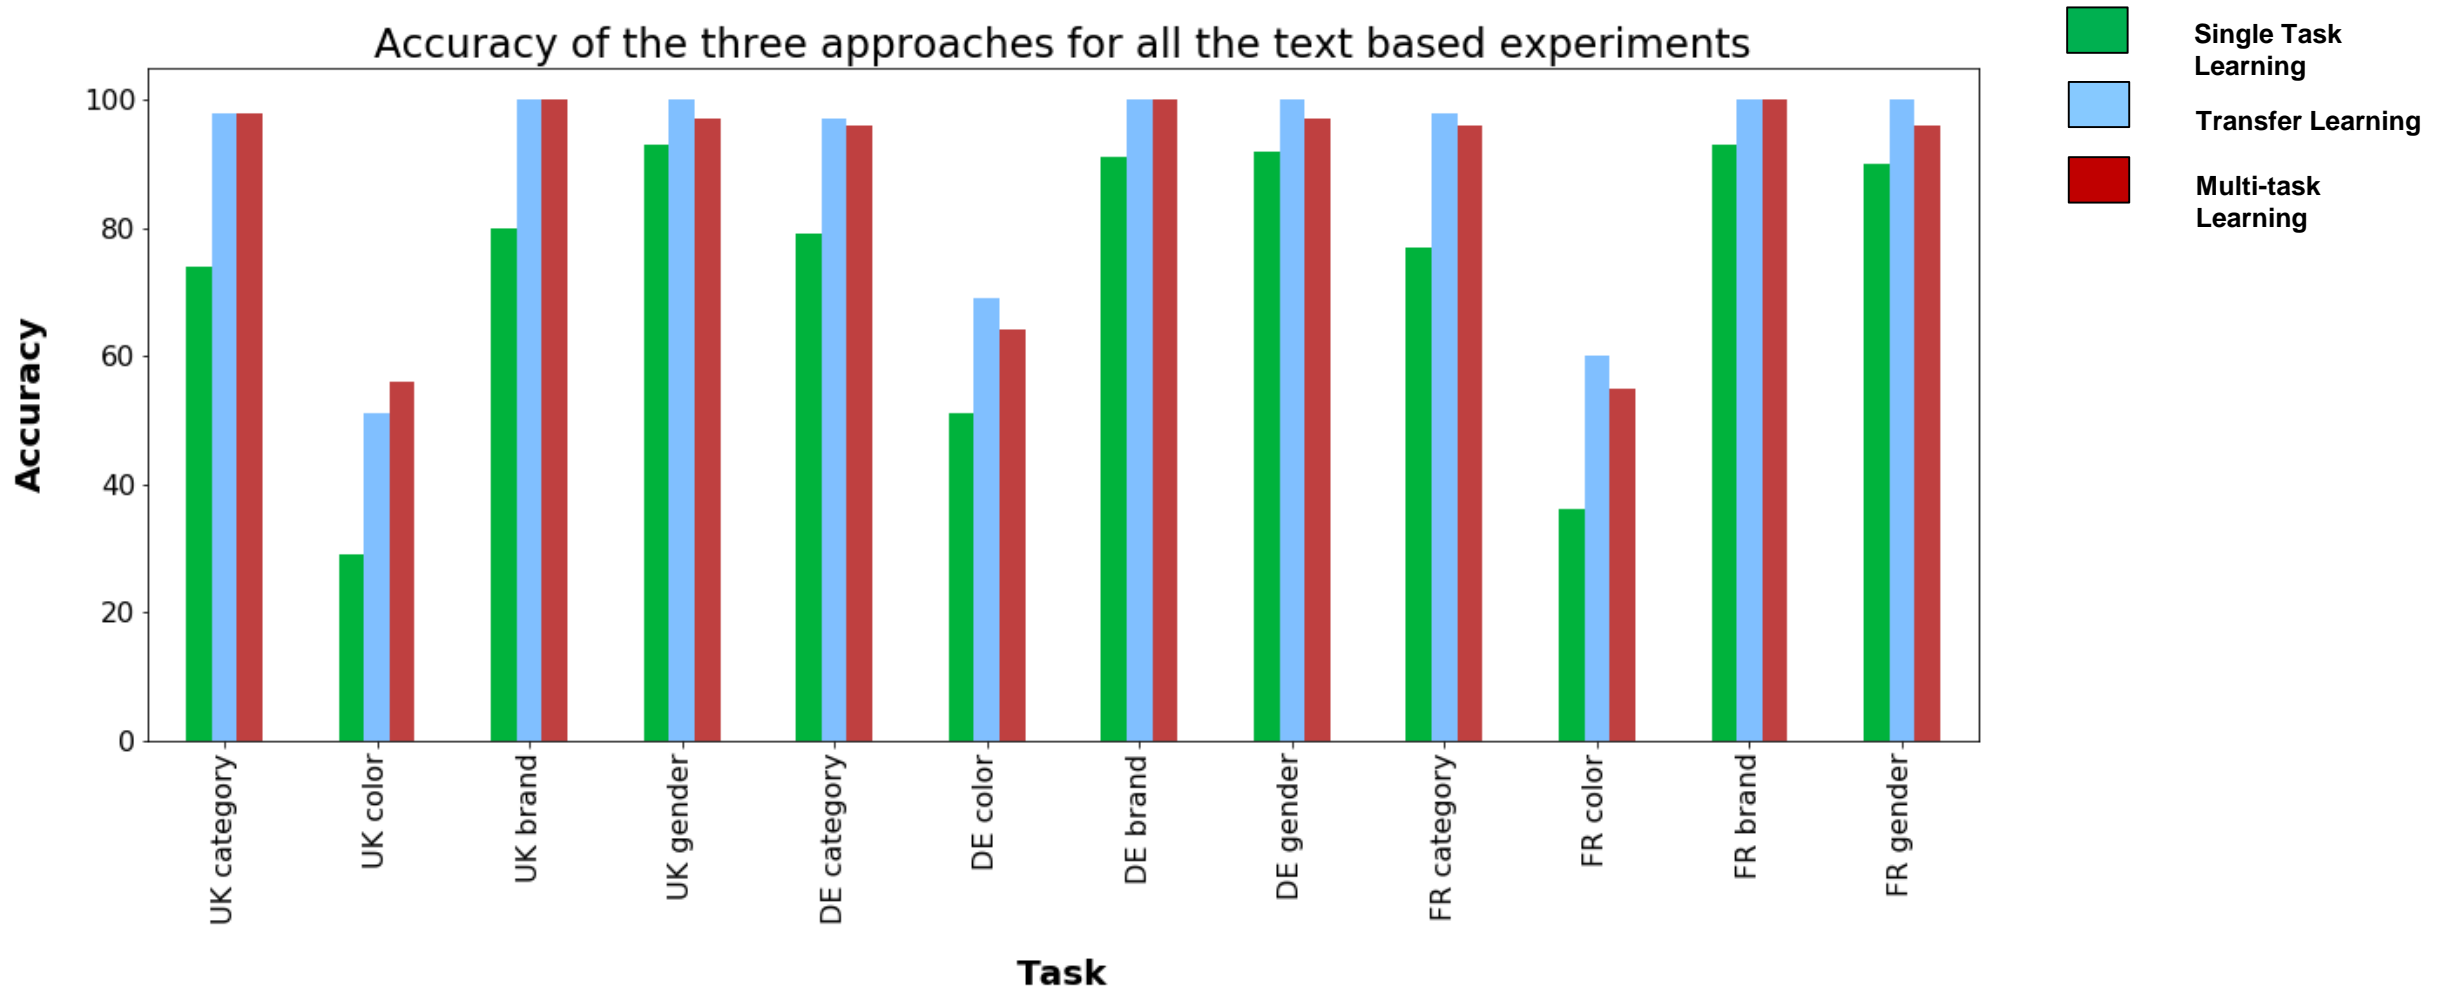

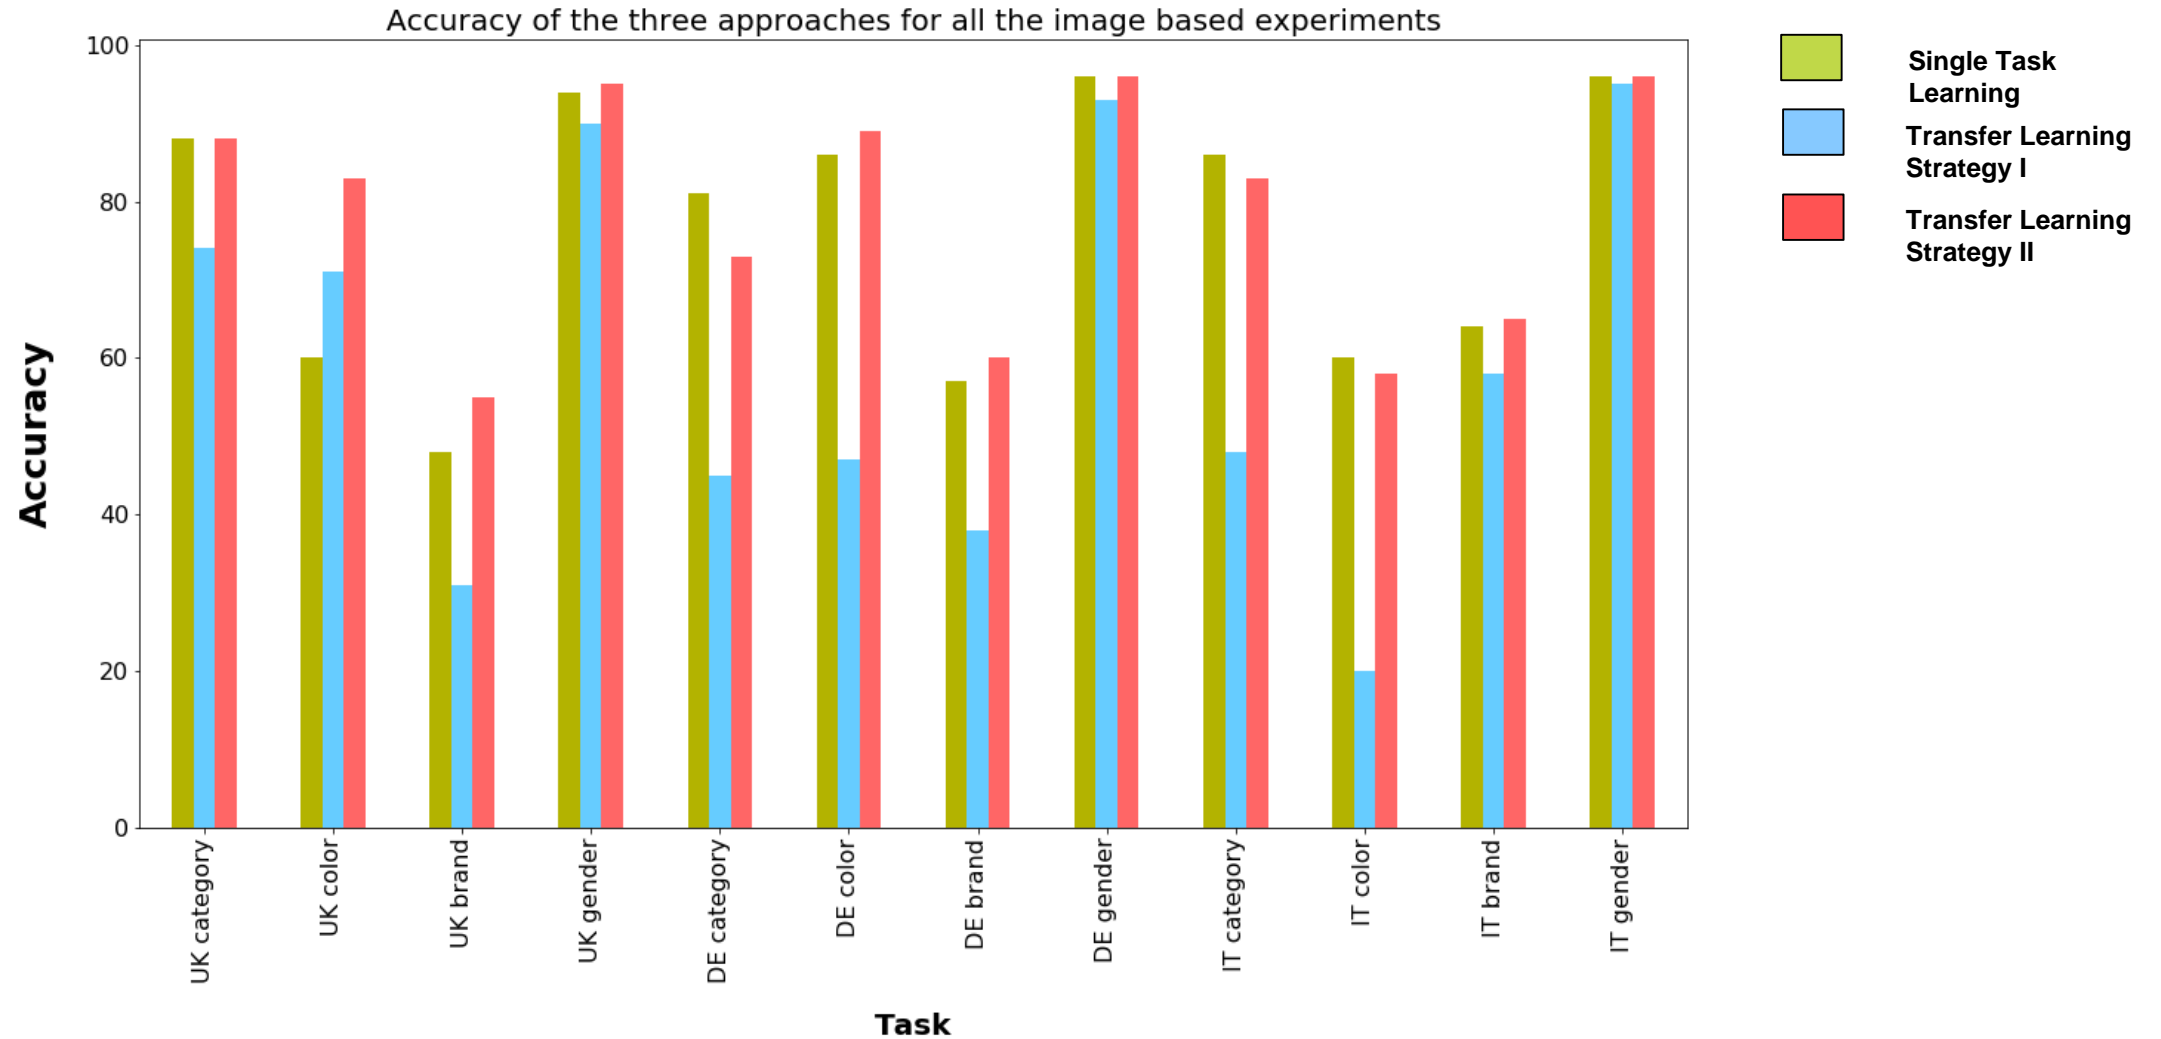

Evaluation- Across Task Approaches

- Text based

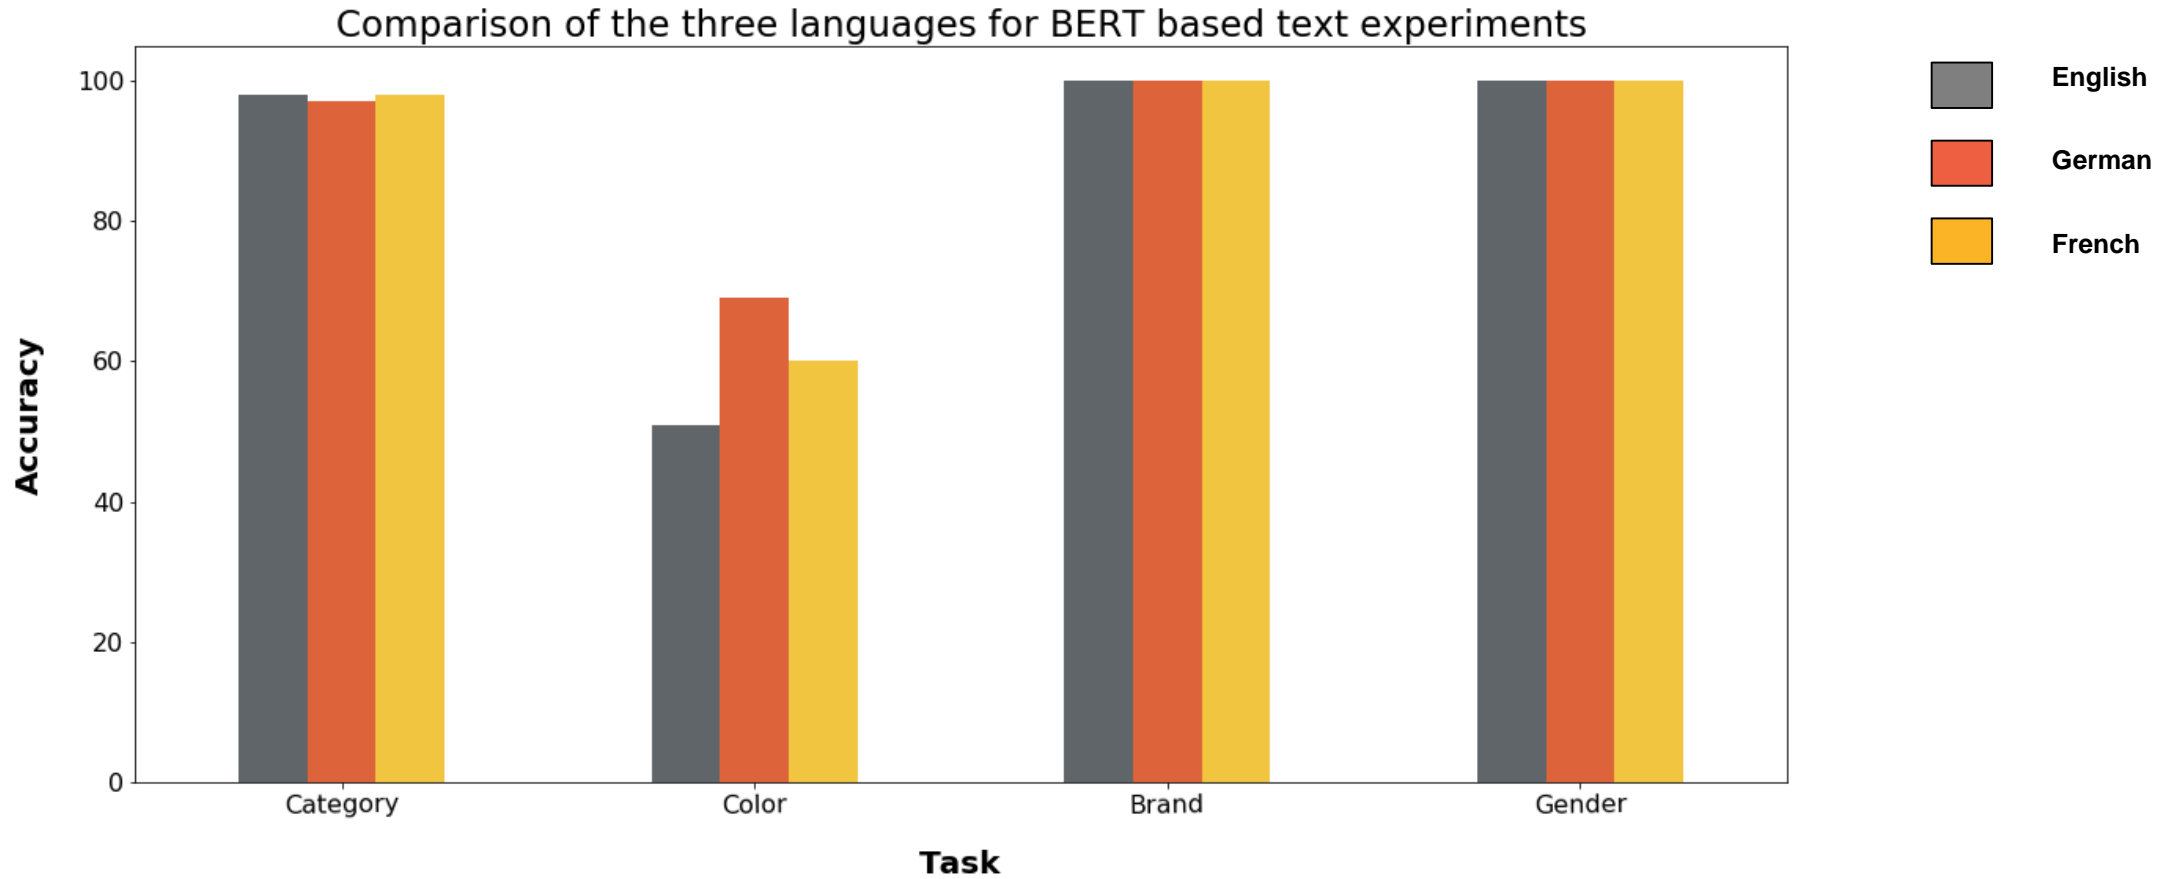

Evaluation- Across Task Approaches

- Image based: STL requires 2x more time to train in comparison with TL

AmazonBasics Hardside Luggage Suitcase - 78cm, Navy Blue
by AmazonBasics
★★★★★ 141 customer reviews | 56 answered questions

Price: **£69.99** & **FREE Delivery** in the UK. [Delivery Details](#)

1 new from **£69.99**

Size Name: **78 cm**

3 Piece Set 55 cm 68 cm **78 cm**

Colour Name: **Navy Blue**

- Large 78-centimetre (inner dimension 71 cm) hardside spinner luggage - ideal for trips lasting longer than a week
- Protective hard shell with scratch-resistant finish; made of extra-thick ABS (thicker than the competition) for enhanced strength and durability
- Fully lined interior with divider; 150D-polyester interior organizer with 3 zippered pockets for conveniently storing smaller items
- Expandable for up to 15% additional packing capacity; solid, strong zippers; telescoping handle for comfortable maneuvering; securely mounted short handle
- 4 double spinner wheels ensure smooth-rolling mobility in any direction

Breathable Suit Carrier Covers Bag Dress Garment Bag with Pockets Carry Handles Gusset and Shoe Bag for Traveling and Closet Organization, 152cm x 60cm x 15 cm

by Syeelex
★★★★★ 16 customer reviews

Price: **£16.98 & FREE UK Delivery** on orders dispatched by Amazon over £20. [Delivery Details](#)

Apply 5% voucher [Details](#)

Note: This item is eligible for [click and collect](#). [Details](#)

2 new from £11.98

Size Name: **152cm Garment Bag with Shoe bag**

110cm Garment Bag with Shoe bag £14.99	152cm Garment Bag with Shoe bag £16.98
---	---

- Breathable Travel Garment Bag-Foldable suit cover is made from breathable 120GSM non-woven fabric, sturdy than others like 60-80gsm. Travel suit carrier with 5.9" gusset can hold two suits and two gown dresses.
- Multifunction-- Multi suit garment bag ideal length for suit, dance costumes evening
- Metal Grommet & Double Carry Handles-- Dress bag for business travel with durable metal grommet allow hangers to pass through for folding during light travel, with double handle that allows you to easy transport.
- Clear Visible Window & Double Pocket -- Suit bags for men with clear PVC window so you can easily identify which clothes inside without opening the closet suit bag; with a clear pocket zipper bag and a large pocket zipper bag behind the cloth garment covers bag for more storage and save space. You can storage tie, jewelry, power bank, iPad etc.
- Package-- One pcs garment cover bag (152cm * 60cm * 15 cm) and bonus one pcs shoes bag (45.2 cm * 18.5 cm * 12.9 cm), It's perfect for all your storage and travel needs.
