

Design and Implementation of a Bikesharing Service as part of an open Mobility-Ecosystem

Master Thesis - Final Presentation

Weidner, Lucas | 21.11.2016

DriveNow

Integrating all in one mobility ecosystem

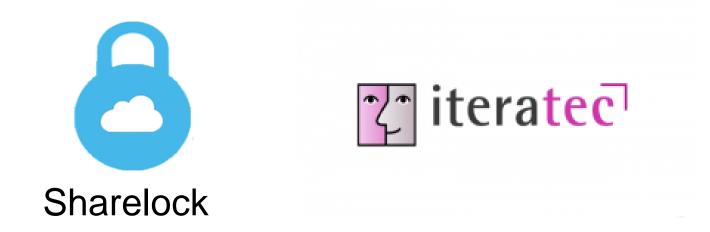

iteratec Bikesharing Service:

- Electronical bike lock
- Bikesharing System

Components to implement:

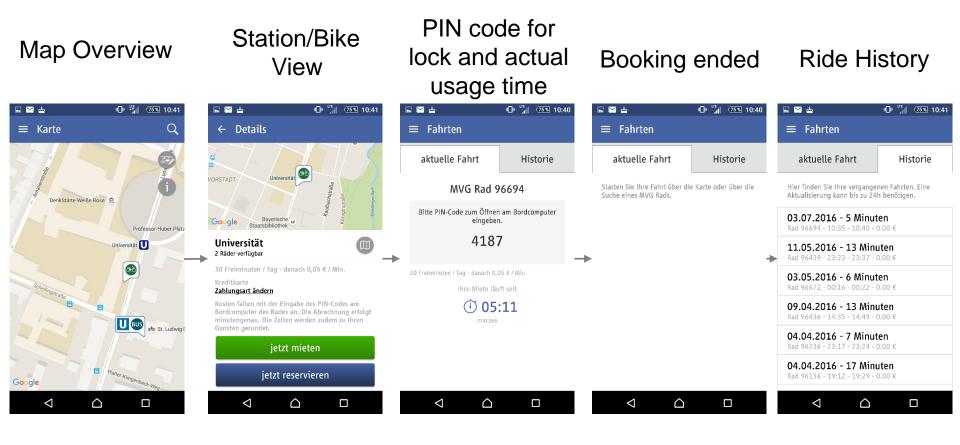

- Administration Frontend
- Android Application for User (communication with server and lock)
- Backend with Interface for open Mobility-Ecosystem

	Station-based or flexible zone	Locks	Business Model (price 30 min)	Clients	Online/ offline
Open Source Bike Share	Station-based	4 digit PIN locks	Customizable	Private users	Offline
Call A Bike	Both possible	Call a number and receive an unlock code	Pay per time (1 Euro)	Private and train users	Online
Chemnitzer Stadtfahrrad	Station-based	Opening on presentation of identity card	Pay per day (2 Euro)	Tourists and locals	Offline
CERN	Station-based	Opening with membership card on bike station	Free or 1 CHF per day between 01/06 and 30/09	Employees	Online
Google	Flexible zone	No locks	Free	Everyone	Offline
Sharelock	Flexible zone	Opening via app	Pay per time (not stated)	Iteratec employees	Offline

Workflow MVG

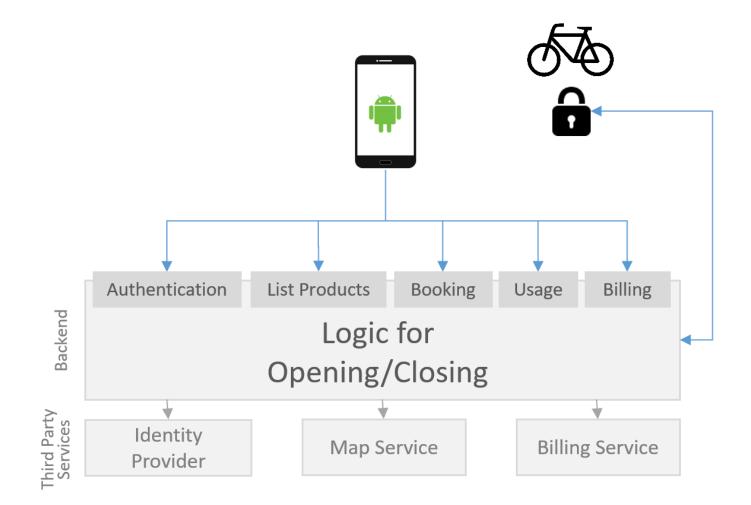

Costs: no monthly internet costs for lock

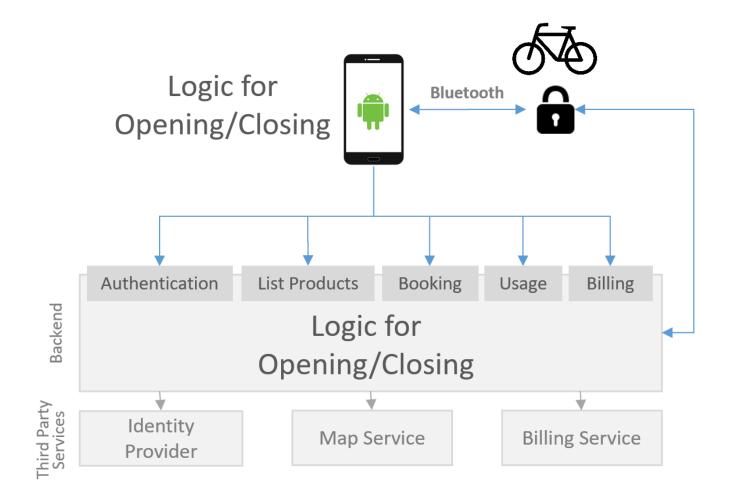

Architecture - Components

Costs: monthly costs for internet access of the lock

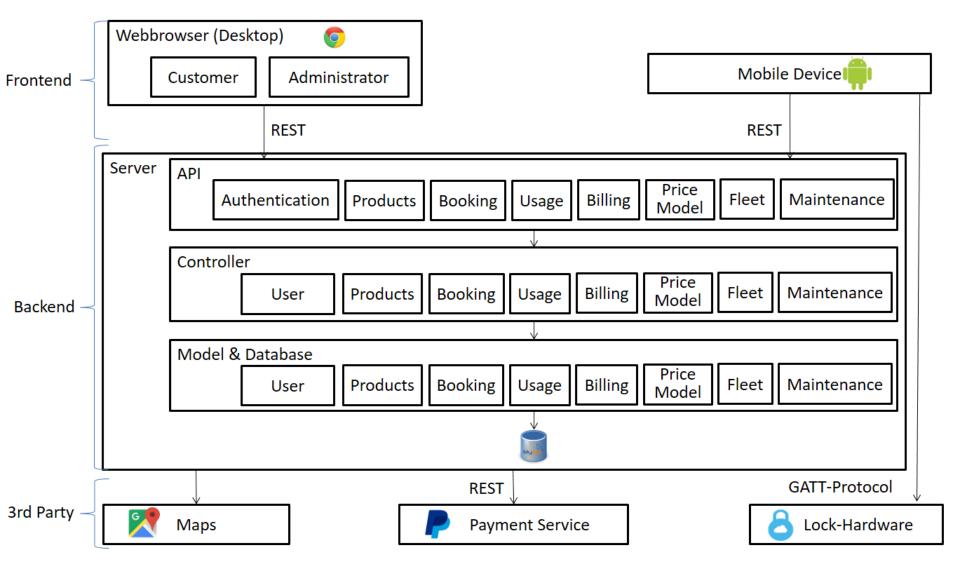

Costs: monthly costs for internet access of the lock

Factor/Architecture	Online	Offline	Hybrid
Number of needed communication technologies	low	high	medium
Price	expensive	free	expensive
Maintainability	good	bad	good
Convenience for user	good	bad	good
Convenience for service provider	medium	medium	medium
Convenience for mobility platform provider	good	bad	good

<u>Decision</u>: Offline architecture, because of cheap proof of concept

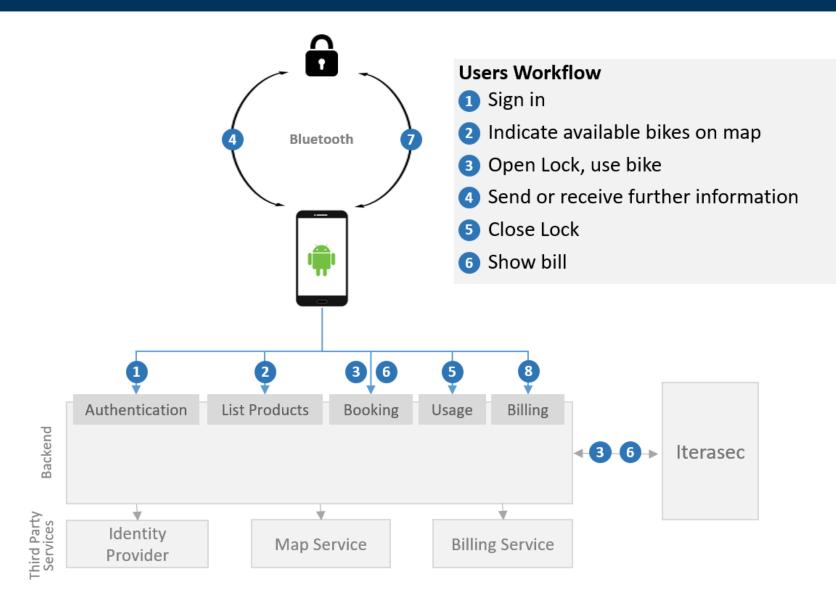

Sharelock - Service and Components

sebis

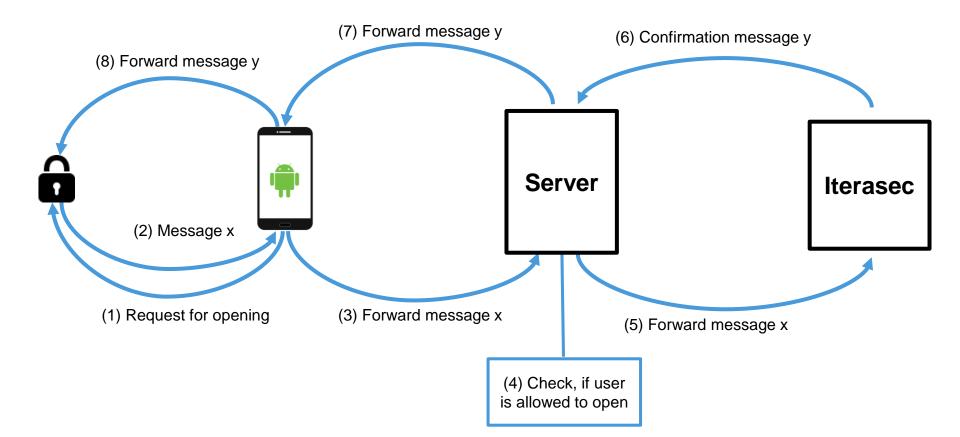

Overall Sharelock Workflow

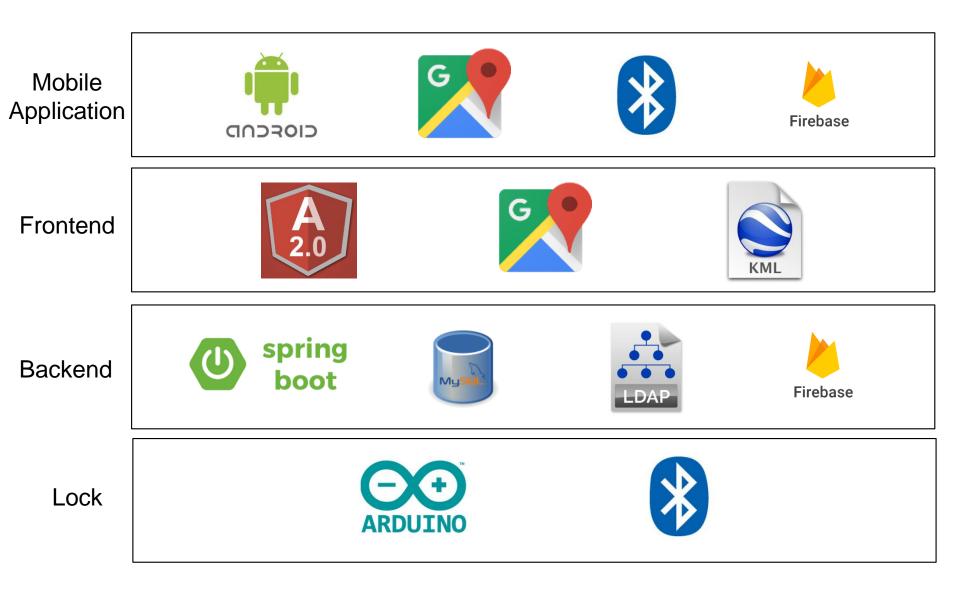

Sharelock Opening/Closing Workflow

Technology

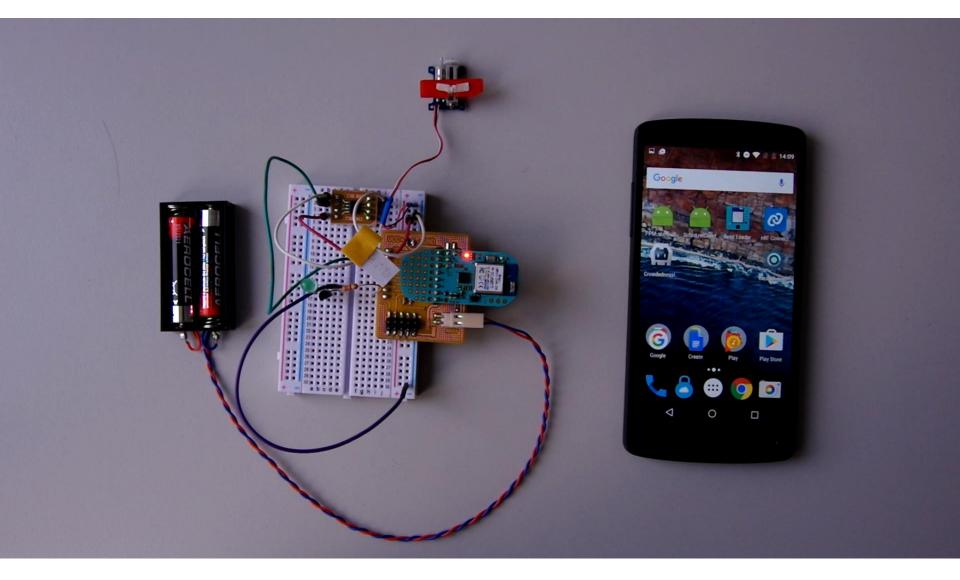

LIVE DEMO

Evaluation

<u>Case 1:</u>

- Finding and opening a lock
- Realizing a flat wheel \rightarrow send notification (maintenance task)
- Closing the lock

SUS Score: 80/100 (*)

<u>Case 2:</u>

- Login to Administration Frontend
- Assign mechanic to maintenance task for the lock
- Put lock back into operation (deblocking)

SUS Score: 79/100 (*)

(*) biased because evaluation was done by technical-oriented students

© sebis 18

Conclusion

»Implemented:

- Backend
- Administration Frontend
- Android App

- Basic Functionality covered and evaluated by students
- Sharelock Service can be integrated into Mobility Ecosystem

Outlook

Iteratec:

- Launch Sharelock as soon as possible
 - → finishing hardware development
- Providing Sharelock for the employees

Improvements:

- Adding payment service
- Add Machine Learning for maintenance prediction
- Add Google Location for addresses

Thank you for your attention! Questions?

Lock Prototype

Comparison Sharing Provider

	Station-based or flexible zone	Locks	Business Model (price 30 min)	Clients	Online/ offline
Open Source Bike Share	Station-based	4 digit PIN locks	Customizable	Private users	Offline
Nextbike	Both possible	Different types (app, smartcard or login at on- board computer)	Customizable (1 Euro)	Different types (private events, hotels, business,)	Online
JCDecaux	Station-based	Opening with membership card	Customizable (free with 7 day ticket)	Private users	Online
Call A Bike	Both possible	Call a number and receive an unlock code	Pay per time (1 Euro)	Private and train users	Online
StadtRAD Hamburg	Station-based	Call a number and receive an unlock code	Pay per time (free)	Tourists and locals	Online
Konrad	Station-based	Call a number and receive an unlock code	Pay per time (1 Euro)	Private users	Online
metropolradruhr	Station-based	Combination lock	Pay per time (1 Euro)	Tourists and locals	Online
NorisBike	Both possible	Combination lock	Pay per time (1 Euro)	Tourists and locals	Online
MVG Rad	Both possible	on-board computer	Pay per time (2.4 Euro)	Tourists and locals	Online
Fächerrad	Both possible	on-board computer	Pay per time (1 Euro)	Tourists and locals	Online
MVGmeinRad	Station-based	Opening with membership card on terminal	Pay per time (1.4 Euro)	Tourists and locals	Online
Chemnitzer Stadtfahrrad	Station-based	Opening on presentation of identity card	Pay per day (2 Euro)	Tourists and locals	Offline
BiCiBUR	Station-based	Opening with membership card on terminal and entering PIN	Flat rate for 15 Euro per year	Locals	Online
Melbourne Bike Share	Station-based	Entering PIN code which you receive from terminal with your credit card	Free	Tourists and locals	Online
CERN	Station-based	Opening with membership card on bike station	Free or 1 CHF per day between 01/06 and 30/09	Employees	Online
Google	Flexible zone	No locks	Free	Everyone	Offline
Cargo Bikesharing	Station-based	Opening on presentation of identity card and codeword	Free	Locals	Offline
Sharelock	Flexible zone	Opening via app	Pay per time (not stated)	Iteratec employees	Offline
