Description

 Answer

 Answer

Answer

Answer

Navigation

- Courses and Questions will be categorized based on the domain for ease of navigation
 - for e.g. Chair of Software Engineer, Chair of Database etc.
- Mixture of popularity based navigation for courses and task based organization as our navigation pattern
- User can directly search for the courses
 - And also,
 - Can see & rank courses
 - Put queries or share experience

Managing Content

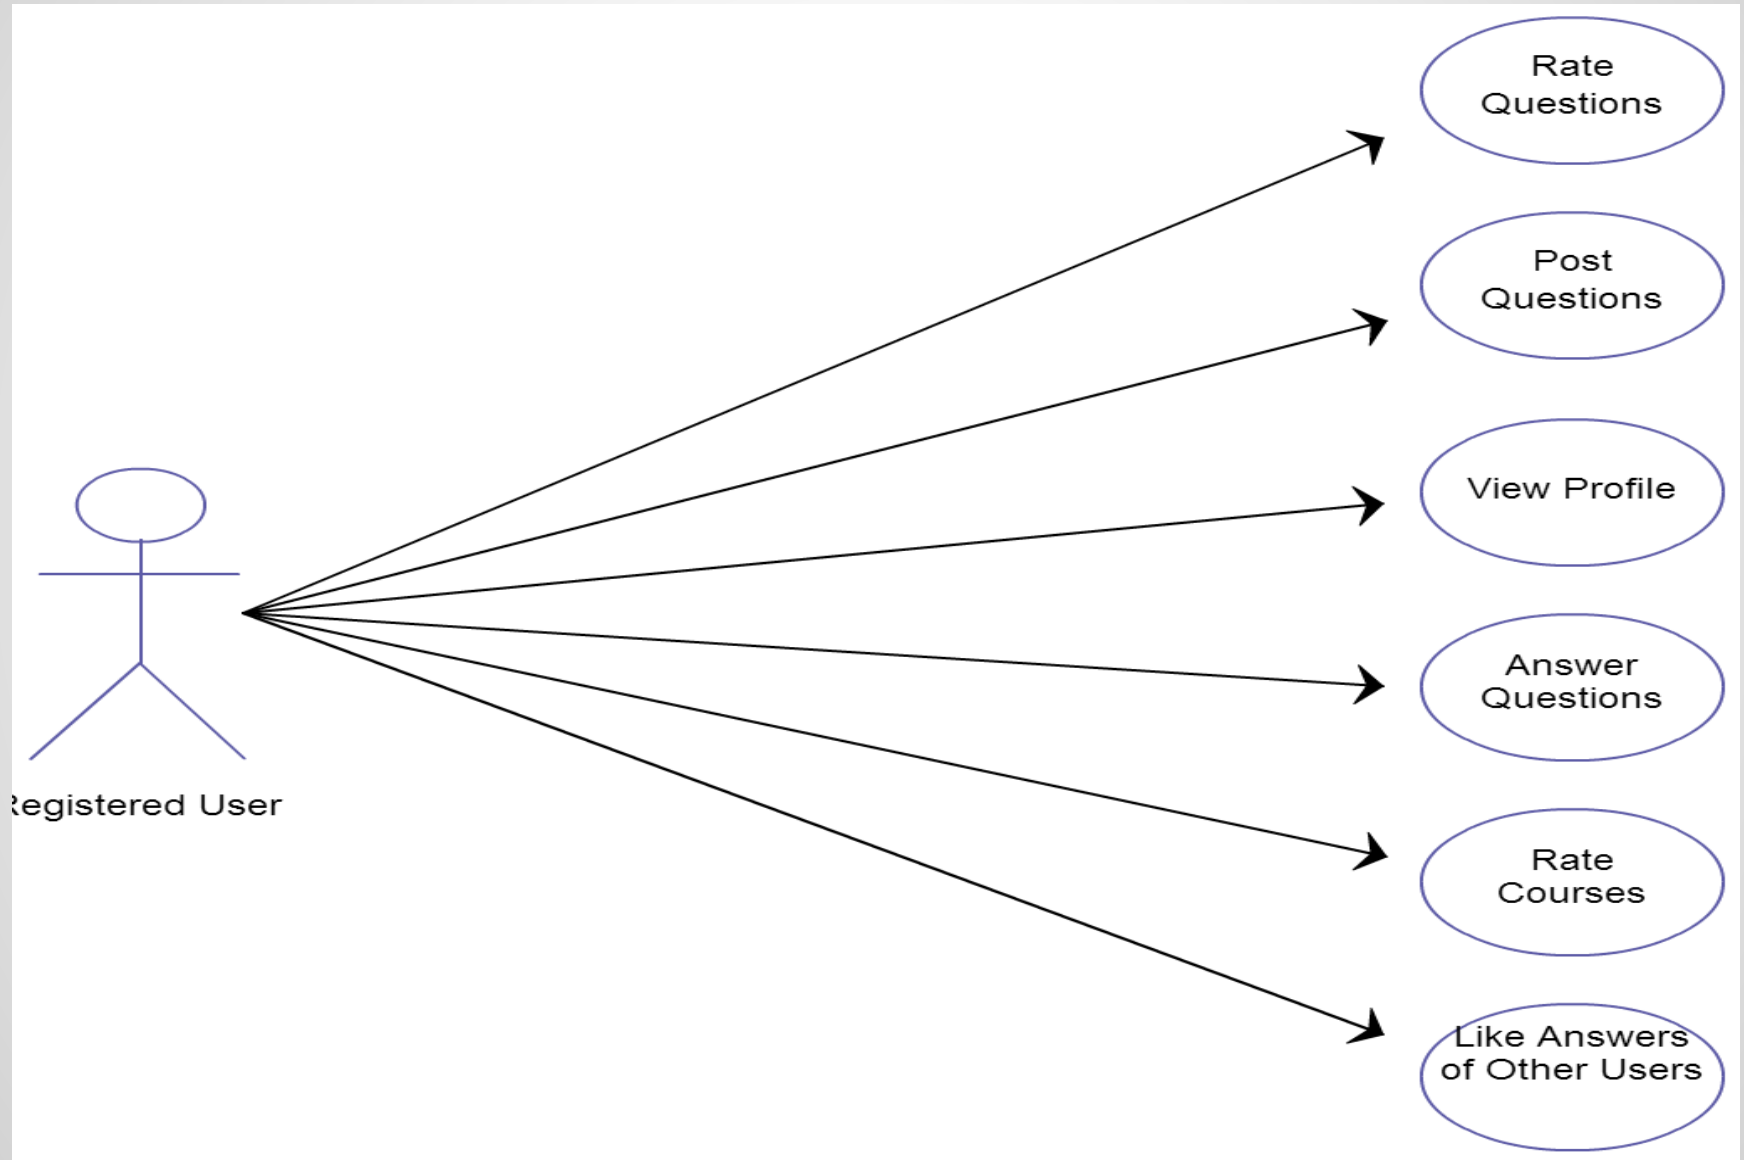

- Course Message boards / Q&A Section
- Consistent layout for content
- Continuous scrolling of content
- Adding permalinks to questions
- Type Ahead while searching
- Images leading to detailed student events.

Building Trust and Credibility / Sign In

- Using University email to authenticate the user
- Fair information practice
- Email notifications for courses and questions one is subscribed on

Use Case - I

Use Case - II
